

Factory Price 99% Purity Fat Loss Peptide Frag Hgh

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-HGH Frag176-191
- Minimum Order Quantity: 5box
- Price: US\$ 119-139/ box
- Packaging Details: 10mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Name: Hgh Frag 176-191
- Molecular Weight: 1817.1
- Molecular Formula: C78H123N23O23S2
- CAS: 863288-34
- Specification: 10mg/vial, 10vials/box
- Appearance: White Powder
- Storage: 2-8
- Highlight: **Frag Hgh Fat Loss Peptide,
99% Purity Fat Loss Peptide,
10mg/Vial Frag Peptide**

Product Description

Factory Price 99% Purity Fat Loss Peptide Frag Hgh

Basic Information Form Of Frag Hgh

Product Name	Frag Hgh
Cas No.	863288-34
Molecular Formula	C78H123N23O23S2
Peptide Purity	Over 98%
MW	1817.1
Storage	2-8
Appearance	White powder
Shelf Life	2 years

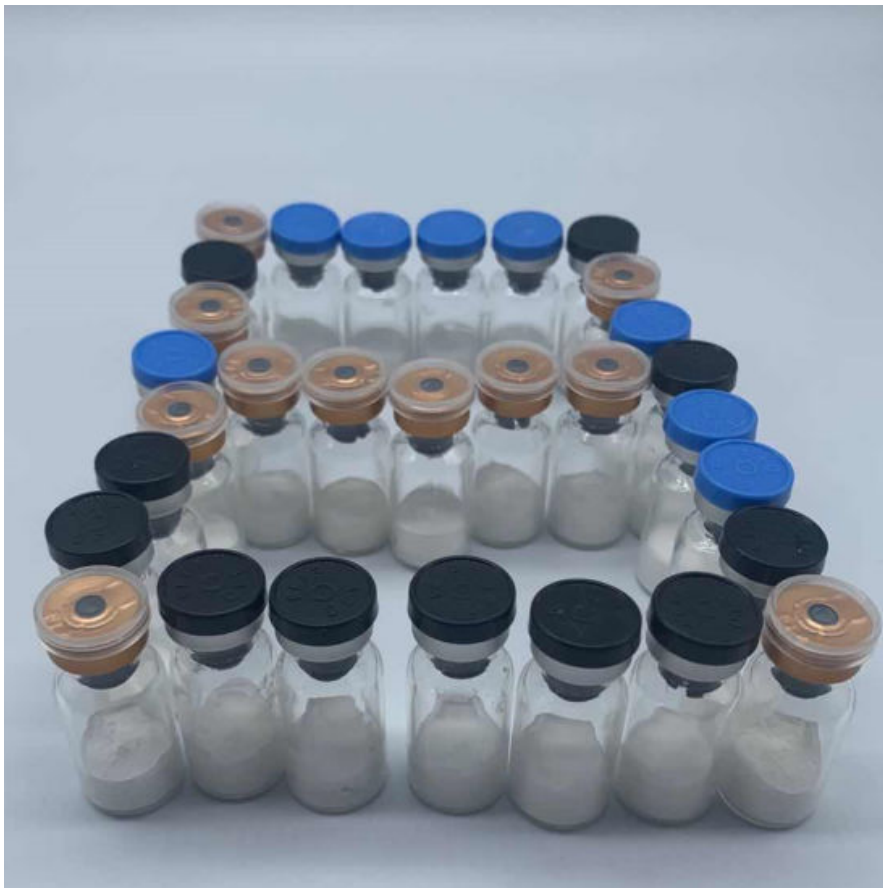

What is Frag Hgh

The HGH fragment (176-191) is a synthetic peptide that represents the short specific portion of the amino acid chain of HGH (amino acids at positions 176-191 at the C-terminus of the human growth hormone). Just this fragment of HGH is responsible for its strong fat burning properties, but does not have strong impact on insulin levels as HGH does. Clinical trials confirms, in both humans also animals, HGH Fragment leads to lipolysis (breakdown of fat) and inhibits lipogenesis, wherein, the HGH fragment can be up to 12.5 times more potent than HGH for fat burning. HGH fragment 176-191 mimics the way natural human growth hormone regulates the breaking down of fat, but without the unwanted side effects on blood sugar, insulin level or cell proliferation.

Similar to unmodified HGH, this truncated form of human growth hormone helps with fat metabolism and inhibits the creation of fatty acids and other lipids in the body. But, HGH Fragment directly affects the adipose tissue, specifically the adipose fat cells, and increases lipolytic action. Thanks to this, fat metabolism runs faster and stronger than in the case of HGH, and HGH Fragment 176-191 seems to be more suitable option for fat burning and obesity treatment than regular human growth hormone.

HGH FRAG 176-191 is known as the most powerful peptide for weight loss. It's a fragment of human growth hormone and helps burn fat mass. HGH Fragment 176-191 can regulate fat metabolism without causing insulin problems or other undesirable side effects. Scientists discovered that HGH FRAG 176-191 stimulates lipolysis much better than HGH. Lipolysis is the decomposition of fat mass, so they concluded that HGH FRAG 176-191 inhibits lipogenesis. That is, it helps stop the formation of fatty acids and other lipids. However unlike other peptides or fat burning approaches, individuals who use HGH FRAG 176-191 have rarely or never shown hunger or nervousness caused by ephedrine. Also, HGH FRAG 176-191 does not compete with HGH receptors which means that it does not cause hypoglycemia.

Benefits of Frag Hgh

The HGH Fragment was [proved](#) effective as a weight loss solution, but you can also draw more benefits from using the growth hormone. Here are some reasons you should include the product as a part of your lifestyle.

- Boosts the ability to burn fat
- Does not increase glucose or insulin levels
- Boosts energy levels
- Increases bone density
- Offers anti-aging benefits
- Stimulates lipolysis
- Helps with weight loss
- Improves muscle recovery

Package and Shipping of Frag Hgh

Package: 10mg/vial, 10vials/box

Shipping: With 3-5 days after your payment
