

CAS 946870-92-4 Igf1 Lr3 Body Building Peptides For Add Muscle 1mg/Vial

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Igf1 Lr3
- Minimum Order Quantity: 5box
- Price: US\$ 145-160/ box
- Packaging Details: 1mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: MoneyGram, Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Name: Igf1 Lr3
- CAS: 946870-92-4
- Molecular Weight: 9117.6
- Molecular Formula: C400H625N111O115S9
- Synonym: Long R3-IGF-1; IGF-1 Long R3
- Specification: 1mg/vial, 10vials/box
- Appearance: White Powder
- Storage: 2-8
- Highlight: Add Muscle Body Building Peptides, Muscle Growth Peptides CAS 946870-92-4, Igf1 Lr3 Injectable Peptides Bodybuilding

Product Description

Buy Igf1 Lr3 1mg/vial CAS 946870-92-4 For Add Muscle

Basic Information Form Of Buy Igf1 Lr3

Product Name	Buy Igf1 Lr3
Cas No.	946870-92-4
Molecular Formula	C400H625N111O115S9
Molecular Weight	9117.6
Appearance	White powder
Peptide Purity	99%
Synonym	Long R3-IGF-1; IGF-1 Long R3
Shelf Life	2 years

What is Buy Igf1 Lr3

Synthetic peptide IGF-1 LR3 is lengthened analogue of endogenous peptide hormone IGF-1 (human insulin-like growth factor 1). Unlike regular IGF-1, its prolonged version IGF-1 LR3 has an arginine instead of a glutamic acid at the third position in its amino acid sequence ("arginine 3"), and also has an additional 13 amino acids at its N-terminus (MFPAMPLLSLFVN) ("long"). Total length of its amino acid chain is 83 amino acids unlike 70 amino acids of regular IGF-1.

IGF-1 LR3 still retains its strong pharmacological activity as an agonist of the IGF-1 receptor, but due to the mentioned modifications has very low affinity for the insulin-like growth factor-binding proteins (IGFBPs) unlike regular IGF-1 does have, and also has improved metabolic stability. As a result, it is approximately three times more potent than IGF-1, and possesses a significantly longer half-life of about 20 hours.

Clinical trials have shown, that IGF-1 LR3 binds with high-affinity to IGF-1 receptor (IGF1R), and due to its significantly reduced binding to IGF-binding proteins, is even more metabolic stable and potent than regular IGF-1 in stimulating hypertrophy and proliferation of cells. IGF-1 LR3 can be suitable treatment in catabolic states (using the peptide to induce anabolism in catabolic conditions such as muscular dystrophy). IGF-1 has a strong ability to maintain and build muscle. In addition to a direct anabolic effect on skeletal muscle, the production of more IGF-I is also capable of stimulating the proliferation and differentiation of muscle stem cells (satellite cells) – real growth of new muscle cells. Peptide hormone IGF-1 is the only hormone that can do this.

Functions of Buy Igf1 Lr3

- 1.It facilitates protein synthesis in the body.
- 2.It regulates the storage of fat and channels it to be used for the production of energy. This results in a noticeable fat loss.
- 3.Promotes positive effects on metabolism; increasing lean body mass and decreases fat
- 4.It increases the regenerative properties of the body's nerve tissues.
- 5.Upregulates anti-oxidant benefit and ligament strength
- 6.It boosts hyperplasia in muscle cells, which leads to fuller muscle tissues.

Package and Shipping of Buy Igf1 Lr3

Package: 1mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of Buy Igf1 Lr3

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
