

Muscle Mass Bodybuilding Peptide Igf 1 Lr 3 99% Purity

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Igf 1 Lr 3
- Minimum Order Quantity: 5box
- Price: US\$ 38-58/ box
- Packaging Details: 0.1mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: MoneyGram, Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Name: Igf 1 Lr 3
- CAS: 946870-92-4
- Molecular Weight: 9117.6
- Molecular Formula: C400H625N111O115S9
- Synonym: Long R3-IGF-1; IGF-1 Long R3
- Storage: 2-8
- Appearance: White Powder
- Specification: 0.1mg/vial, 10vials/box
- Highlight: **Body Building Peptides 99% Purity, Igf 1 Lr 3 Bodybuilding Peptide, Muscle Peptide Injections Bodybuilding**

Product Description

Muscle Mass Bodybuilding Peptide Igf 1 Lr 3 99% Purity

Basic Information Form Of Igf 1 Lr 3

Product Name	Igf 1 Lr 3
Cas No	946870-92-4
MF	C400H625N111O115S9
MW	9117.6
Storage	2-8
Appearance	White powder
Peptide Purity	99%
Shelf Life	2 years

What is Igf 1 Lr 3

IGF1-LR3 is a modified version of insulin-like growth factor-1. The full name of the peptide is insulin-like growth factor-1 long arginine 3. All IGF-1 derivatives play prominent roles in cell division, cell proliferation, and cell-to-cell communication. Though it has similar effects, IGF-1 LR3 does not adhere to IGF binding proteins as strongly as IGF-1. This results in IGF1-LR3 remaining in the bloodstream 120 times longer than IGF-1. IGF1-LR3 gains its prolonged half-life as a result of its structural changes. The peptide is created by adding 13 amino acids to the N-terminal end of IGF-1 and by converting the glutamic acid at position 3 of IGF-1 to an arginine residue.

IGR1-LR3 is a breakthrough peptide that has shown great results without many of the side effects or risks of other more commonly prescribed fat loss medications. IGF-1 LR3 inhibits the movement of glucose into the body's cells which facilitates fat burning and the use of fat in the body for the production of energy. Its effects last most of the day and have made it a preferred variant by a majority of patients and physicians. When IGF-1 LR3 is active in the body, it functions differently in different types of tissues. For instance, in muscle tissue, it makes the muscle more sensitive to insulin's effects, such as a reduction in fat storage.

IGF-1 Long R3, or IGF-1 LR3, is a form of IGF that has been chemically altered with changed amino acids. It consists of 83 amino acids with a substitution of Arg(R) for the Glu(E) at position three, hence, the name R3. The alterations enable it to avoid binding to proteins in the body, which allows it to have a longer half-life.

Functions of Igf 1 Lr 3

- 1.It boosts metabolic rate.
- 2.It reverses the insulin sensitivity of the pancreas.
- 3.Burns fat stores, reducing body fat levels in users.
- 4.It enhances energy levels and libido.
- 5.It dramatically increases muscle-building capability.
- 6.It improves the regenerative effect of sleep by enhancing sleep quality.
- 7.It helps to alleviate feelings of depression.
- 8.It boosts your cognitive function.

Package and Shipping of Igf 1 Lr 3

Package: 0.1mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of Igf 1 Lr 3

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
