

High Purity Human Growth Peptide BPC 157 Tendon Healing Glass Bottles

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-BPC-157
- Minimum Order Quantity: 5 Box
- Price: US\$ 66-86/ box
- Packaging Details: 10mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: Western Union, T/T, MoneyGram
- Supply Ability: 3000kg/Month

Product Specification

- Name: BPC 157 Tendon Healing
- CAS: 137525-51-0
- Color: White
- Material: Powder
- Specification: 10mg/vial, 10vials/box
- MOQ: 5 Box
- Storage: 2~8 °C
- Shelf Life: 2 Years
- Highlight: Tendon Healing Human Growth Peptides, Glass Bottles BPC 157 Peptide

Product Description

Glass Bottles High Purity Human Growth Peptide BPC 157 Tendon Healing

Basic Information Form Of BPC 157 Tendon Healing

| | |
|--------------|------------------------|
| Product Name | BPC 157 Tendon Healing |
| Cas No. | 137525-51-0 |
| MW | 1419.556 |
| MF | C62H98N16N22 |
| Appearance | White powder |
| Assay | 99% |
| Shelf Life | 2 years |

What is BPC 157 Tendon Healing

BPC-157, which stands for Body Protection Compound 157, is a peptide chain that consists of 15 amino acids. Since such a sequence doesn't exist in nature, the compound is considered synthetic. However, it is based on a protective compound that is present in the human stomach.

Numerous studies and lab research experiments conducted on rodents have shown that BPC-157 can have a variety of therapeutic and physical effects.

BPC-157 works by triggering the formation of new blood vessels, a process that is called angiogenesis. Such activity promotes healing and induces faster regeneration of cells. It also works by blocking or preventing the growth-inhibiting effects of a molecule named 4-hydroxynonenal. So, when you buy BPC-157, it will stimulate the tendon cells to make even more receptors for the growth molecules, which will, in turn, induce them to grow and move during injury repair.
