

White Powder Body Building Peptides Ipamorelin Acetate For BodyBuilding

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Ipamorelin
- Minimum Order Quantity: 5box
- Price: US\$ 44-58 / box
- Packaging Details: 5mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product Name: Ipamorelin Acetate
- Molecular Formula: C38H49N9O5
- Molecular Weight: 711.86
- Appearance: White powder
- CAS No.: 170851-70-4
- Purity: 99%
- Storage: Cool Dry Place
- Highlight: **Body Building Peptides Ipamorelin Acetate, White Powder Ipamorelin Acetate, Ipamorelin Acetate For BodyBuilding**

Product Description

White Powder Body Building Peptides Ipamorelin Acetate For BodyBuilding

Basic Information Form of Ipamorelin Acetate

Product Name	Ipamorelin Acetate
CAS No.	170851-70-4
Purity	99%min
Molecular Formula	C ₃₈ H ₄₉ N ₉ O ₅
Molecular Weight	711.86
Appearance	White powder
Specification	5mg/vial, 10vials/box
Storage	Cool Dry Place

Product Information Of Ipamorelin Acetate

There are numerous Growth Hormone Releasing Peptides but out of all of them, Ipamorelin is the cleanest, safest and the most versatile. Many of Ipamorelin's characteristics and modes of action resembles those of GHRP-6 and GHRP-2, the pentapeptide of Ipamorelin also resembles Hexarelin but compared to Hexarelin, it is much cleaner. Ipamorelin acts like all the other Growth Hormone Releasing Peptides but without the slack side effects of elevated hunger problems.

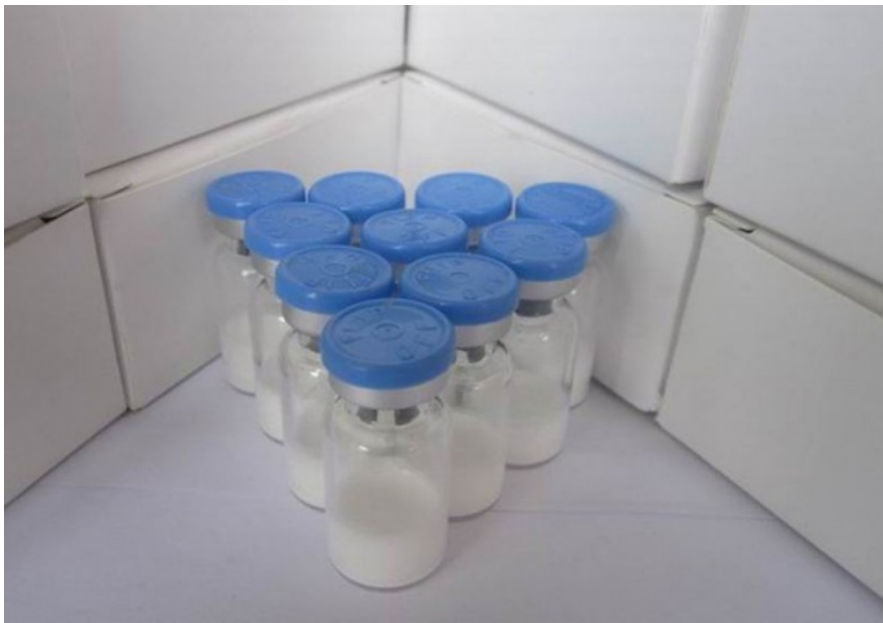

What makes Ipamorelin better than other peptides?

When it comes to selecting a peptide that is right for you, you will most likely prefer one that is released slowly, steadily and periodically. With this, you will be able to mimic the natural production of the Growth Hormone in your body and even attain better results by releasing a strong and steady pulse constantly. This technique has proven to work better and facilitate greater mass gaining. It also helps you to avoid the negative side effects that can be presented by this medication. Ipamorelin has a mode of action that is exactly like that of a Ghrelin mimetic but unlike the other peptides, this particular peptide has shown more stability in cutting down somatostatin and stimulating the release of the Growth Hormone.

How does Ipamorelin actually work?

When a patient is administered with a dose of Ipamorelin, a selective pulse is sent throughout the body, this stimulates the pituitary gland and the hypothalamus to release the Growth Hormones. This pulse can last for up to 3 hours after the administration of this dose. Once the Growth Hormone pulse is sent through the body, growth cells move directly to the muscles where they support muscle development and at the same time, they stay alert of any cartilage or bone growths. This is exceptionally beneficial for long-term users of Ipamorelin because this drug will only affect the growth of lean muscles without posing any threats to bone and cartilage deformation and growth. This can never be the case when it comes to synthetic Human Growth Hormone users who often experience numerous side effects which are related to swelling of the joints and in other cases, the Carpal Tunnel. Ipamorelin increases the synthesis of cells and it elevates the release of insulin from the pancreatic tissues. It also increases the levels of Ghrelin in the stomach which helps to control hunger. All these processes work together to facilitate a substantial release and action of growth hormones in the body and they also promote fat loss, shuttling of nutrients, and it aids in building lean and clean muscles that will greatly increase your mass.

Product Picture of Ipamorelin Acetate

Benefits of Ipamorelin Acetate

Decreased joint and muscle pain
 Increased cellular repair and regeneration
 Increased bone mineral content, improving osteoporosis and osteopenia conditions
 Enhanced mental clarity and focus
 Improved skin tone and texture
 Improved immunity
 Strengthened and more efficient cardiac, pulmonary and renal systems
 Diminished aging process

Package and Shipping Of Ipamorelin Acetate

Package: 5mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of of Ipamorelin Acetate

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines,TNT, FEDEX, EMS, ect.
