### Product Information of Selank Peptide

Selank is a synthetic heptapeptide analog of the endogenous tetrapeptide tuftsin. In the spectrum of pharmacological action of Selank predominates anxiolytic (anti-anxiety) with the stimulatory effect (activating) component. It works by influencing the exchange of monoamines in hypothalamus, diencephalon, the neocortex (emotional brain structures) and enzyme activity (tyrosine and tryptophan). Selank normalizes the level of serotonin in the brain, increases the resistance of neurons in the cerebral cortex to functional loads of high intensity. As a nootropic, Selank enhances mental functions, reduce mental fatigue, improves focus, and enhances memory.

Selank is a synthetic analog of human immunoglobulin G (tetrapeptide tuftsin). It has anxiolytic and neuroprotective effects and used to treat generalized anxiety disorder. Selank is effective in stress reduction, alleviation of depression, reversal of anhedonia, improvement in mood, and cessation of insomnia. Activates the processes of learning, memory, analysis and reproducing information, improves the short-term memory and attention. Selank has no embryotoxic, teratogenic, allergenic and irritating action; doesn't cause drug dependence phenomena.
