

99% Purity Weight Loss Peptides Hexarelin 2mg / Vial CAS 140703-51-

1

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Hexarelin
- Minimum Order Quantity: 5box
- Price: US\$ 36-42/ box
- Packaging Details: 2mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: MoneyGram, Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product Name: Hexarelin
- CAS NO.: 140703-51-1
- Molecular Formula: C₄₇H₅₈N₁₂O₆
- Molecular Weight: 887.0
- Compound: His-2-Me-D-Trp-Ala-Trp-D-Phe-Lys-NH₂
- Appearance: White Powder
- Peptide Purity: 99% Min
- Shelf Life: 2 Years
- Highlight: **Weight Loss Peptides Hexarelin 2mg ,
Hexarelin 2mg / Vial 140703-51-1 ,
99% Hexarelin 2mg / Vial**

Product Description

99% Purity Weight Loss Peptides Hexarelin 2mg/vial CAS 140703-51-1

Basic Information Form of Hexarelin

Product Name	Hexarelin
Molecular Formula	C47H58N12O6
Cas No	140703-51-1
Appearance	White Powder
Purity	99%min
Molecular Weight	887.0
Shelf Life	2 years
Synonyms	Hexarelin Acetate, Examorelin

What Is Hexarelin

Hexarelin (Hexarelin Acetate) is a synthetic hexapeptide in the growth factor family which stimulates the release of growth hormone (GH) and does not interfere with the body's ability to produce its own GH. Structurally, Hexarelin (Hexarelin Acetate) is similar in structure to GHRP-6 but without the appetite increase because of its inability to drastically increase Ghrelin levels which is responsible for the increased appetite and quicker gastric emptying. Hexarelin is a synthetic growth hormone secretagogue made from six amino acids. It contains powerful growth hormone releasing properties in the human body. Hexarelin in studies over a certain period has shown that it reduces visceral fat. Hexarelin (Hexarelin Acetate) like other Growth Hormone Releasing Peptides is most effective synergistically when administered with GHRH such as Sermorelin or Modified GRF 1-29.

Due to Hexarelin ability to increase secretion of natural Growth Hormone, most of its effects are similar to those of synthetic GH, although to a slightly lesser extent. Effects of its use include: increase in strength, the growth of new muscle fibres, increase in the size of already existing muscle fibres, neural protection, joint rejuvenation, protection and healing. Also, the GH receptors in adipose (fat) tissue allow for potential fat reduction with Hexarelin use. The increase of circulating GH through Hexarelin use causes levels of Insulin-Like Growth Factor (IGF-1) to rise in the liver. IGF-1 is the prime cause of muscle growth in response to GH stimulation.

There is no appetite boost with Hexarelin use (as opposed to GHRP-6's extreme appetite increase) due to its inability to drastically increase Ghrelin levels that are responsible for added hunger and quicker gastric emptying.

In studies where Hexarelin was injected subcutaneously, Growth Hormone, measured through plasma concentrations, increased significantly and within thirty minutes of injection. GH levels decreased back to normal around four hours post injection. The GH increase has been found to be effective up to 2mg/kg, any further increase in dose was found to be ineffective in causing a GH response.

Research showed that Hexarelin's effect on GH stimulation tapered between weeks 4 through 16. Separating cycles by 4 weeks off periods, avoiding the negative feedback loop and the next cycle of Hexarelin produced the same level of results as the first cycle.

Product Picture of Hexarelin

Benefits Of Hexarelin

As a growth hormone-releasing peptide (GHRP), hexarelin ensures an organic growth hormone release (GH).

Hexarelin stimulates the growth of new muscle fibers. This leads to the development of lean muscle mass by bulking up of muscles as well as enhancing body strength.

As hexarelin binds to the CD36 receptors located on blood cells, it greatly improves cardiovascular functioning by maintaining the normal cardiac parameters such as left ventricular ejection fraction (LVEF), cardiac output, stroke volume, and decreasing the peripheral resistance in the blood vessels .

This helps athletes meet the physical realms needed to boost their overall performance.

Hexarelin induced release of growth hormone (GH) also burns down body fat, thereby causing weight loss.

This peptide improves overall skeletal health. This is done by making joints more flexible and making tendons, joints, and ligaments grow healthy. Hexarelin stimulates the growth of new muscle fibers. This leads to the growth of lean muscle mass by bulking up of muscles as well as enhancing body strength .

This musculoskeletal growth makes the individual more resistant to injuries.

The optimal release of growth hormone due to hexarelin causes growth and proliferation around wounds and injuries so that the recovery process is quick yet effective.

Besides, hexarelin is also hypothesized to improve sleep quality to considerable levels by setting up the natural sleep rhythms.

Package and Shipping of Hexarelin

Package: 2mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of Hexarelin

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q3: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q4: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer better price for you.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines,TNT, FEDEX, EMS, ect.
