

Skin Fast Tanning Melanotan 10mg Melanotan II Mt 2 CAS 121062-08-6

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Melanotan II
- Minimum Order Quantity: 5 box
- Price: US\$ 45-55 /box
- Packaging Details: 10mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: MoneyGram, Western Union, T/T
- Supply Ability: 3000kg/Month

Product Specification

- Product Name: Melanotan II
- CAS No.: 121062-08-6
- Molecular Formula: C₅₀H₆₉N₁₅O₉
- Molecular Weight: 1024.2
- Product Purity: 99%min
- Colour: White
- Shelf Life: 2 Years
- Highlight: **Skin Fast Tanning Melanotan 10mg ,
Skin Fast Tanning Melanotan II,
Skin Fast Tanning Mt 2**

Product Description

Skin Fast Tanning Melanotan 10mg Melanotan II Mt 2 CAS 121062-08-6

Basic Information Form of Melanotan II

Peptide Name	Melanotan II
CAS NO.	121062-08-6
Peptide Purity	99%
Molecular weight	1024.2
Molecular Formula	C50H69N15O9
Colour	White Powder
Store	Cool Dry Place
MOQ	5box

What Is Melanotan II

Also known as melanin or tanning injections, research has found Melanotan 2 stimulates the body's melanocortin receptors. Melanotan 2 (MT-2) is a peptide which has been synthetically manufactured to act in the same way as the body's own natural hormone. As a result of its consumption, the body's melanocytes are stimulated to produce melanin which enables people to tan.

Melanin is the pigment which is responsible for determining someone's skin and hair colour as well as the colour of their eyes (retina). Its production and release is controlled by the pituitary glands by the polypeptide melanocortin and is a hormonal process. Once activated, this hormone is naturally produced by the specialised skin cells, the melanocytes which are located in the upper layer of skin.

Melanotan 2 works in stimulating melanin production which depends on a number of factors such as the user's skin type, their body weight, how much they are exposed to UV rays and so on.

The scientific term for tanning is called melanogenesis, and it is the body's natural protection against damage from harmful UV rays including damage to the skin's DNA. In the natural process called ultrafast internal conversion, the melanin within the skin cells absorbs the harmful ultraviolet rays of the sun, converts them into heat and also causes the skin to tan.

Melanotan 2 is a synthetic melanocortine which mimics this natural process. It acts as a hormonal catalyst encouraging the body's skin cells to produce more melanin. In this way, the skin is protected. Tanning can take place much more quickly without spending hours in the sun with the possible negative effects it can have on the skin and long-term health.

Although some companies claim that Melanotan 2 can stop skin cancer, this is misleading. What it does is to limit damage to the skin by the production of melanin and the protection of deep skin pigmentation in the form of a tan.

Additionally, according to research, the peptide Melanotan 2 has been shown to produce erections in men with ED (erectile dysfunction) and treat rosacea, fibromyalgia, and other conditions.

Once peptides have been reconstituted, they must be kept refrigerated. For this reason, like all our peptides Melanotan 2 is sold in the form of lyophilized powder. Before being used, it must be mixed with bacteriostatic water. This keeps the peptide fresh for longer and prevents bacteria from developing. After reconstitution, it must be stored in the fridge.

Dosages and Usage of Melanotan II

Both Melanotan-1 and Melanotan 2 are analogs of the peptide hormone alpha-melanocyte stimulating hormone (α -MSH) that tend to induce skin tanning. Unlike Melanotan 1, Melanotan 2 has been shown to have aphrodisiac properties, the additional effect of increasing libido. Melanotan-1 is a non selective agonist of the melanocortin receptors (MC1R, MC3-5R). As an analogue of α -MSH, its mechanism of action is biomimicry of the natural mammalian tanning process.

Package and Shipping of Melanotan II

Package: 10mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of Melanotan II

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
