

99% High Purity Peptide Mt-II Mt2 Melanotan 2 Peptides For Skin Tanning

Our Product Introduction

for more products please visit us on peptide-powder.com

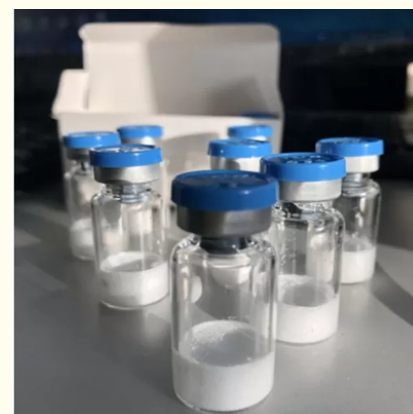

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Melanotan-2
- Minimum Order Quantity: 5 box
- Price: US\$ 45-54 /box
- Packaging Details: 10mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: MoneyGram, Western Union, T/T
- Supply Ability: 3000kg/Month

Product Specification

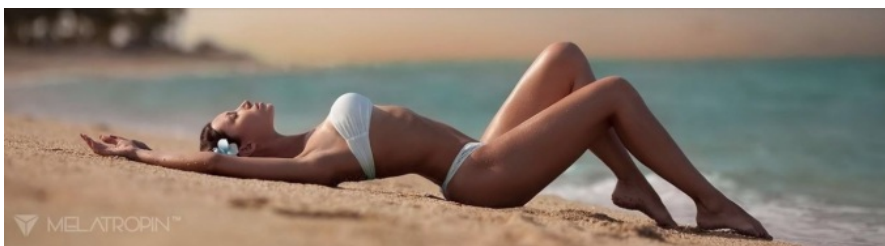

- Peptide Name: Melanotan-2
- CAS No.: 121062-08-6
- Peptide Purity: >99%
- Molecular Formula: C50H69N15O9
- Molecular Weight: 1024.2
- Aspect: White Lyophilized Powder
- Shelf Life: 2 Years
- Highlight: **Mt2 Melanotan 2 Peptides,
99% Melanotan 2 Peptides,
Melanotan 2 Peptides For Skin Tanning**

Product Description

99% High Purity Peptide Mt-II Mt2 Melanotan-2 for Skin Tanning

Basic Information Form of Melanotan-2

Name	Melanotan-2
CAS NO.	121062-08-6
Purity	99%min
MW	1024.2
MF	C50H69N15O9
Appearance	White lyophilized powder
Store	2-8°C
MOQ	5box

Product introduction Of Melanotan-2

Description

Melanotan II is a synthetic analogue of the melanocortin peptide hormone alpha-melanocyte stimulating hormone (α -MSH) that occurs naturally. In usage, Melanotan II has been revealed to have aphrodisiac and melanogenesis (tanning) effects that have been subjected to clinical trials and preliminary studies. The compound is a cyclic lactam analogue of α -MSH that has an amino sequence named MTII (Ac-Nle-c[Asp-His-D-Phe-Arg-Trp-Lys]-NH₂). Notably, no government drug regulatory agency across the world had approved for the use of any compound incorporating the Melanotan II peptide by 2010

Historical D.evelopment

Melanotan II was first developed at the University of Arizona. Various studies conducted at the institution confirmed that the best defence against skin cancer was melanin activated in the skin, a tan. The researchers assumed that an effective procedure to reduce the rates of skin cancer in individuals would be by inducing the body's natural pigmentary system to produce a tan that would be protective before exposure to UV.

Melanogenesis is a process by which the skin's pigment cells (melanocytes) produce the hormone α -MSH naturally causes the skin's pigment (melanin).

After numerous clinical trials by administration of the endogenous hormone to the body, the scientists found that though it appeared to work, α -MSH had a very short half-life in the body to be practical as a therapeutic drug. Therefore, they opted to look for a more stable and potent alternative that would be more practical. Subsequently, after numerous trials, they developed Melanotan I and after that Melanotan II

Product Image Of Melanotan-2

Effects of Melanotan-2

- TDarker skin with less exposure to UV radiation
- Minimize risk of melanoma, otherwise known as skin cancer
- Reduce incidence of sun-damaged skin
- Enable fair skinned individuals to develop a tan through MT2 peptide without causing damage to their skin
- Eliminate body fat

Increase libido
Stimulate male erections

Package and Shipping of Melanotan-2

Package: 10mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of Melanotan-2

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
