

Melanotan 1 Muscle Building Peptides For Fat Decomposition CAS 75921-69-6

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Melanotan 1
- Minimum Order Quantity: 1 box
- Price: US\$ 55-60/box
- Packaging Details: 10mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 3000kg/Month

Product Specification

- Name: Melanotan 1
- CAS No.: 75921-69-6
- Color: White Lyophilized Powder
- Assay: 99%
- Molecular Formula: C78H111N21O19
- Molecular Weight: 1646.35
- Shelf Life: 2 Years
- Store: Cool Dry Place
- Highlight: Melanotan 1 Muscle Building Peptides, Melanotan 1 For Fat Decomposition, CAS 75921-69-6 Melanotan 1

Product Description

Melanotan 1 Muscle Building Peptides For Fat Decomposition CAS 75921-69-6

Basic Information Form of Melanotan 1

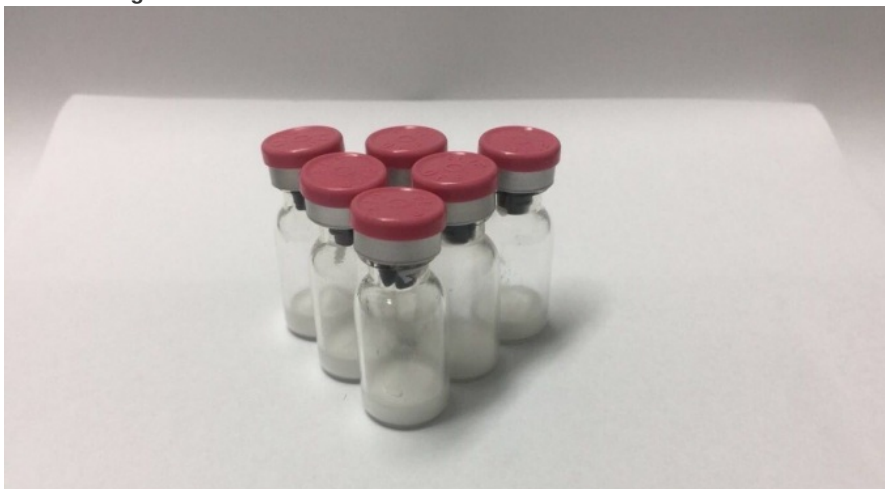

Product Name	Melanotan 1
CAS NO.	75921-69-6
MF	C78H111N21O19
EINECS NO.	unavailable
Purity	99%
Appearance	White Lyophilized Powder
Shipping address:	Provide your Valid and Correct destination address info with post code, phone number.
Store	Cool Dry Place

Brief Introduction of Melanotan 1

Melanotan 1 is very similar to naturally occurring alpha melanocyte stimulating hormone alpha-MSH (Melanotan 2). Alpha-MSH is primarily known for its influence on melanocytes, the cells in skin and hair responsible for pigmentation. This function is mediated via strong binding to melanocortin receptor 1. Alpha-MSH is a non-selective full agonist of melanocortin receptors 1, 3, 4, and 5. Melanotan 1 differs from alpha-MSH (Melanotan 2) by a single amino acid and was actually first developed as a sunless tanning agent. Research into melanocortin receptors and their effects was relatively limited at the time and scientists quickly discovered that while melanotan 1 did indeed cause pigmentation, it also increases sexual arousal, boosted appetite, and altered baseline metabolism. Subsequent study of melanotan 1 and other melanocortin-binding proteins helped scientists to better understand the melanocortin signaling system.

Melanotan 1 is a synthetic analogue of alpha-melanocyte stimulating hormone. It is used clinically, in Europe, to prevent sun-related skin damage (i.e. phototoxicity) from occurring in people suffering from erythropoietic protoporphyria. Though initially developed as a sunless tanning agent, melanotan 1 has been found to have a number of physiologic effects on blood pressure, feeding behavior, central nervous system function, and more. The peptide is in phase 3 clinical trials for the treatment of polymorphous light eruption and is in phase 2 clinical trials for the treatment of actinic keratosis (a specific type of skin damage caused by the sun) and its more serious counterpart, squamous cell carcinoma.

Benefits of Melanotan 1

Melanotan 1 can be safely combined with UV-B light or sunlight and appears to act synergistically in the tanning response to light. Decrease in ultraviolet light exposure, found in sunlight and lights used in indoor tanning beds, which decreases the likelihood of skin cancers or other skin issues.

If desired, Melanotan I will darken and tan the complexion of the skin

Package and Shipping of Melanotan 1

Package: 10mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of Melanotan 1

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
