

Epitalon Cas 307297-39-8 Lyophilized Powder In A Vial Anti Aging

Our Product Introduction

for more products please visit us on peptide-powder.com

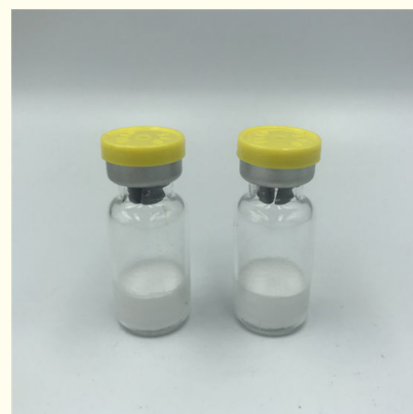

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Epitalon
- Minimum Order Quantity: 5box
- Price: US \$ 50-55 / box
- Packaging Details: 10mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: MoneyGram, Western Union, T/T
- Supply Ability: 3000kg/Month

Product Specification

- Name: Epitalon
- CAS No.: 307297-39-8
- MF: C14H22N4O9
- MW: 390.35
- Appearance: White Powder
- Purity: 99%
- Highlight: **307297-39-8 Lyophilized Powder In A Vial, Epitalon yophilized Powder In A Vial, Lyophilized Powder Anti Aging**

Product Description

Epitalon Cas 307297-39-8 White Lyophilized Powder for Anti Aging

Basic Information Form of Epitalon

Name	Epitalon
CAS NO.	307297-39-8
Appearance	White Powder
MW	390.35
MF	C14H22N4O9
Purity	99%
Stability	2 years

Brief Introduction of Epitalon

Epithalon (also known as Epitalon, Epithalone or Epithalamin) is a short synthetic peptide known to activate the telomerase enzyme and stimulate melatonin release. First developed in Russia in the 1980s, epithalon has been shown to delay age-related changes in reproductive and immune systems and increase the life span of mice and rats. Though it is primarily of interest in anti-aging research, epithalon has shown significant effects in certain types of cancer, infectious disease, and in DNA regulation.

How Does Epitalon Work?

Before we can discuss how Epitalon works, let us focus on our genetic make-up, that is, DNA. DNA is embedded in the nucleus of our cells. At the tips of our DNA are strands called telomeres. Telomeres protect DNA and prevent the loss of genetic information during cell division.

However, each cell division inadvertently shortens telomeres. This shortening can also be exacerbated by oxidative stress. When telomeres shorten to a critical size, the cell grows old, which causes aging as we know it.

However, the body produces an enzyme called telomerase, which combats the degradation of telomeres, promoting their rejuvenation and DNA repair. Younger people produce more telomerase and therefore have longer telomeres. Longer telomeres encourage better cell health and rejuvenation. Older people produce less of this enzyme, which causes cells to grow old and die.

This is where Epitalon comes in. It triggers the natural production of telomerase by working on the pineal gland in the brain. Increased telomerase levels protect telomeres from degradation and shortening, thereby aiding in the growth of new cells and rejuvenation of old ones. This effectively slows down aging.

The Benefits Of Epitalon

Increase of human lifespan
Significant boosting of energy levels
Promotion of deeper sleep
Delay and prevention of age-related diseases such as cancer, heart disease and dementia
Improvement of skin health and appearance
Healing of injured and deteriorating muscle cells

Package and Shipping of Epitalon

Package: 10mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of Epitalon

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q4: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
