

99% Purity Peptide Ace 031 For Muscle Building White Powder

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-ACE 031
- Minimum Order Quantity: 5box
- Price: US \$ 260-280 / box
- Packaging Details: 1mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: MoneyGram, Western Union, T/T
- Supply Ability: 3000kg/Month

Product Specification

- Peptide Name: Peptide ACE 031
- Appearance: White Powder
- Alias: ACVR2B
- Specification: 1mg/vial
- Peptide Purity: 99%
- Shelf Life: 2 Years
- Highlight: **99% Purity Peptide Ace 031 ,
Peptide Ace 031 For Muscle Building ,
Muscle Building ace 031 peptide**

99% Purity White Powder Peptide Ace-031 For Muscle Building

Basic Information Form of Peptide ACE 031

Name	Peptide ACE 031
Alias	ACVR2B
Appearance	White Powder
Peptide Purity	99%
Specifications	1mg/vial, 10vials/box
Stability	2 years

What Is Peptide ACE 031

ACE-031 peptide is a myostatin inhibitor protein that is produced to imitate a natural receptor involved in controlling muscle mass, strength and function.

ACE-031 works as a myostatin blocker by binding myostatin and additional proteins that regulate the function of myostatin. Myostatin is an important protein that works to prevent the growth and development of muscle cells. Animals such as the Belgian blue bull produce less myostatin than other breeds of cow and this is responsible for the breeds extremely lean, hyper-sculpted, ultra-muscular physique due to an increased number of muscle fibres.

ACE-031 works by binding myostatin from circulation, which prevents it from binding to its own receptors. These receptors normally function to switch off muscle growth when myostatin is bound, but because the binding is blocked by ACE-31 then muscle growth can continue unrestricted. Animal and human studies using ACE-031 showed increases in lean muscle mass and muscle volume, with beneficial effects on fat and bone biomarkers.

Several pharmaceutical companies are also investigating ACE-031 as a treatment for several muscle-wasting disorders, including amyotrophic lateral sclerosis (ALS) and Duchenne muscular dystrophy (DMD). ACE-031 was concluded to be a promising therapeutic approach for treating DMD and myostatin inhibition was shown to be a promising potential therapy in the treatment of ALS.

Peptides

- Melanotan 1
- IGF LR3 -1
- Erythropoietin(EPO)
- Hexarelin
- CJC-1295 WITH DAC
- Ipamorelin
- B4 (TB-500)
- Sermorelin
- MGF(IGF-1EC)
- GHRP2/ GHRP6
- Tesamorelin
- PEG-MGF
- Selank
- Gonadorelin
- Follistatin
- ACE-031

The Benefits Of Peptide ACE 031

Increases lean body muscle mass

Promotes muscle protection
Boosts energy
Increases metabolism
Improves body strength
Promotes tissue and muscle repair
Increases bone density
Potential treatment of Duchenne Muscular Dystrophy (DMD)
Potential Cancer treatment
Prevents muscle loss
Research and Clinical Studies
Studies Associated with Muscle Protection

Package and Shipping of Peptide ACE 031

Package: 1mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of Peptide ACE 031

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q4: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
