What Is Buy AOD 9604 Peptide

First and foremost, peptide AOD 9604 is a modified form of amino acids 176-191 and was originally used as an anti-obesity drug. Once injected, this hormone derivative can stimulate the pituitary gland, which, in turn, speeds up metabolism and burns body fat.

Overall, peptide AOD 9604 greatly improves the results of dietary restrictions and exercise.

HOW DOES AOD 9604 PEPTIDE THERAPY WORK?

This FDA-approved peptide therapy has the unique ability to target areas of the body where there are abnormally high levels of fat, and works wonders when combined with exercising and consuming a lower calorie diet.

Peptide AOD 9604 has two primary methods of regulating body fat:

Stimulate lipolysis– the breakdown of fats and lipids via the hydrolyzation of triglycerides into glycerol and fatty acids.

Inhibit lipogenesis– the metabolic process that forms fat (even from nonfat foods), which increases the amount of triglycerides in the body.

Furthermore, the amino acids contained in AOD 9604 are the same as those found in the naturally occurring growth hormone (hGH).

WHO CAN BENEFIT FROM AOD 9604?

Researchers have also discovered the benefits of AOD 9604 aren't limited to fat loss, as it also contains various other regenerative properties that may benefit people with:

- Osteoarthritis
- Osteoporosis
- Hypercholesterolemia
- Worn cartilage
- Depression
- Diabetes
- Bone damage

One of the most notable benefits that AOD 9604 brings is the ability to help regulate blood sugar and manage insulin levels. This, in turn, will aid inflammation and weight loss. Just like growth hormone, AOD 9604 also enhances muscle-building.
