

Fat Loss Human Growth Peptides Releasing Factor Tesamorelin Peptide For Adults

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Tesamorelin
- Minimum Order Quantity: 5box
- Price: US\$ 55-66 / box
- Packaging Details: 2mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Name: Tesamorelin Peptide
- Synonyms: Hex-hGRF, ThGRF(1-44), TH-9507, (Hexenoyl Trans-3)-hGRF(1-44)-NH₂
- CAS No.: 218949-48-5
- Molecular Formula: C₂₂₁H₃₆₆N₇₂O₆₇S
- Molecular Weight: 5136
- Appearance: White Lyophilized Powder
- Peptide Purity: >99%
- Highlight: **Fat Loss Human Growth Peptides, Releasing Factor Tesamorelin Peptide, Tesamorelin Peptide For Adults**

WHY CHOOSE US

- Own Factory**
Hongbaiyi has its own factory, which covers 18,000 square meters and is equipped with 4 standardized production workshops.
- Professional Supplier**
Hongbaiyi is a professional supplier of APIs, pharmaceutical intermediates, veterinary medicine, cosmetic raw, nutritional supplements and other natural active ingredients.
- Quality Assurance**
With strict QC system, our product quality is very reliable and stable. Besides, we have strong technical research and development strength.
- Sales Team**
The experienced sales team of Hongbaiyi offers 7*24*365 quality service and the products were exported to over 40 countries around the globe.

OUR CERTIFICATE

Product Description

Fat Loss Growth hormone Releasing Factor Tesamorelin Peptide For Adults

Basic Information Form of Tesamorelin Peptide

Name	Tesamorelin Peptide
Cas No.	218949-48-5
Molecular Formula	C221H366N72O67S
Molecular Weight	5136
Purity	>99%
Shelf Life	2 years
Appearance	White Lyophilized powder

Brief Introduction of Tesamorelin Peptide

Tesamorelin is a growth-hormone-releasing analog that can increase IGF-1 levels in both men and women by an average of 181 micrograms/liter. This growth hormone can bind and stimulate the GHRH receptors that have a similar potency with GHRH.

This growth hormone also hosts many benefits which include:

Nootropic effects

Reducing triglycerides

Tesamorelin has shown to decrease carotid intima-media thickness (cIMT), visceral adipose tissue (VAT) and c-reactive protein (CRP.)

Although, this growth hormone has not been linked to significantly affect other pituitary hormones and other respective mechanisms of the body.

Besides, Tesamorelin can also improve cognitive function for people with old age, and patients who suffer increase risk in Alzheimer's disease due to mild cognitive impairment.

CLINICAL RESEARCH

Strategies have been done to augment pulsatile GH. This is known to benefit patients with excessive visceral adiposity where GH secretion is reduced.

The study's objective was to determine all the effects of a novel GHTH analog, tesamorelin, to endogenous GH pulsatility and insulin sensitivity in healthy males.

Thirteen males from ages 45 to 47 with a body mass index of 27.3 to 1.2kg were given tesamorelin 2mg once daily for two weeks. The assessments were made after two weeks of treatment and as well as two weeks of withdrawal.

At the end of the study, it was found that once-daily short-term treatment with GHRH1-44 analog, tesamorelin, augments basal, and pulsatile GH secretion.

Besides, although tesamorelin significantly increases IGF-1, peripheral insulin-stimulated glucose was observed.

Clinical trials of tesamorelin have also been seen to reduce abdominal fat's fewer side effects than the human growth hormone itself. Although, abdominal fat can return after the tesamorelin is discontinued depending on the preference of the individual taking it.

Tesamorelin has also been shown to reduce lipodystrophy in HIV-infected individuals as well as similarly reducing the abdominal fat found in NON-HIV infected individuals.

Functions of Tesamorelin Peptide

- 1) Tesamorelin used to reduce belly fat in HIV patients, could be the ultimate key for bodybuilders who have trouble getting ripped abs. Tesamorelin reduces visceral fat in HIV-infected patients with abdominal lipo-hypertrophy as well as reducing abdominal fat in all individuals studied.
- 2) Tesamorelin Boosts Cognition in Elderly that increases growth hormone release improved several measures of cognitive function in cognitively normal and mildly impaired older individuals in a placebo-controlled trial, also reported greater subjective improvement in cognition relative to the placebo group.
- 3) Tesamorelin used by Bodybuilders take for Fat Loss, that can help bodybuilders achieve major muscle gains and cut fat quickly and efficiently.

Package and Shipping of Tesamorelin Peptide

Package: 2mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of Tesamorelin Peptide

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
