

Raw White Body Building Peptides Powder Triptorelin For Anti Cancer

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Triptorelin
- Minimum Order Quantity: 5 box
- Price: US \$ 39-45 / box
- Packaging Details: 2mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 3000kg/Month

Product Specification

- Peptide Name: Triptorelin
- Molecular Formula: C₆₄H₈₂N₁₈O₁₃
- Molecular Weight: 1311.45
- CAS No.: 57773-63-4
- Purity: 99%
- Appearance: White Powder
- Shelf Life: 2 Years
- Highlight: Triptorelin Body Building Peptides, Body Building triptorelin peptide, Anti Cancer triptorelin peptide

Product Description

99% Purity Bodybuilding Raw White Peptide Powder Triptorelin For Anti Cancer

Basic Information Form of Triptorelin

Product Name	Triptorelin
CAS NO.	57773-63-4
Molecular Formula	C64H82N18O13
Appearance	White Powder
Purity	99%min
Molecular Weight	1311.45

What Is Triptorelin

Triptorelin, a decapeptide (pGlu-His-Trp-Ser-Tyr-D-Trp-Leu-Arg-Pro-Gly-NH₂), is a gonadotropin-releasing hormone agonist (GnRH agonist) used as the acetate or pamoate salts. By causing constant stimulation of the pituitary, it decreases pituitary secretion of gonadotropins luteinizing hormone (LH) and follicle stimulating hormone (FSH). Like other GnRH agonists, triptorelin may be used in the treatment of hormone-responsive cancers such as prostate cancer or breast cancer, precocious puberty, estrogen-dependent conditions (such as endometriosis or uterine fibroids), and in assisted reproduction. It is also used as therapy in cases of gender dysphoria.

Triptorelin, It is also used as therapy in cases of gender dysphoria. Triptorelin is marketed under the brand names Decapeptyl (Ipsen) and Diphereline and Gonapeptyl (Ferring Pharmaceuticals). In the United States, it is sold by Watson Pharmaceuticals as Trelstar. In Iran Triptorelin is marketed under the brand name Variopeptyl (Varian Darou Pajoh).

Triptorelin, During the treatment of prostate cancer it does cause a surge of testosterone (an initial uplevel of testosterone levels), known as a flare effect. In men a reduction of serum testosterone levels into the range normally seen after surgical castration occurs approximately two to four weeks after initiation of therapy. In contrast, gonadotropin-releasing hormone antagonists do not cause a surge, but a sudden reduction of testosterone levels.

Triptorelin is a gonadotropin-releasing hormone agonist (GnRH agonist). This means it acts on the hypothalamus, which is the part of the brain used for regulation or control of hormones in both men and women. Its known as a control centre but can be influenced to cause an increase in hormonal output, or can be influenced to decrease various hormones but drugs. GnRH is responsible for telling the pituitary gland in the brain to secrete luteinizing hormone (LH) used for testosterone production, or follicle-stimulating hormone (FSH) used for sperm production.

Triptorelin tells the hypothalamus to secrete more GnRH, thus telling the pituitary to secrete LH and FSH, which equals more testosterone in males. But its important that its use is dosed correctly. Too much GnRH stimulating can mean the pituitary shutting down hormone production. This occurs when anabolic steroids are used, such as, Deca-Durabolin, Trenbolone and Testosterone, but is achieved far quicker with Triptorelin.

Applications of Triptorelin

Triptorelin, Growth Hormone Peptides Triptorelin can be used on its own or with other types of treatment. It may be used before or after surgery or radiotherapy. It may also be used to control prostate cancer that has spread to other parts of the body (advanced or metastatic prostate cancer).

Triptorelin, Triptorelin can be given for months or years, depending on your situation. Some men with advanced prostate cancer may have intermittent therapy with triptorelin. This involves having triptorelin treatment for a few months until the cancer is at a very low level (measured by a blood test called a PSA test). You then have a break from treatment and restart triptorelin when its needed.

What is Triptorelin used for?

Treating symptoms of advanced prostate cancer.

Triptorelin is a synthetic analogue of gonadotropin-releasing hormone (GnRH) agonist. It works by decreasing the production of certain

hormones, which reduces testosterone levels in the body.

How does triptorelin work?

Hormones are substances produced naturally in the body. They act as chemical messengers and help control the activity of cells and organs. Hormonal therapies interfere with the way hormones are made or how they work in the body.

Most prostate cancers need the hormone testosterone in order to grow. Almost all testosterone in men is made by the testicles. A very small amount is made by the adrenal glands, which sit above the kidneys. Triptorelin stops the testicles from making testosterone. This reduces testosterone levels and may shrink the prostate cancer or stop it growing.

Package and Shipping of Triptorelin

Package: 2mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of Triptorelin

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q4: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
