

White Powder Human Growth Peptides Gonadorelin Acetate 5Mg

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Gonadorelin
- Minimum Order Quantity: 5 box
- Price: US \$ 46-52/ box
- Packaging Details: 5mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 3000kg/Month

Product Specification

- Peptide Name: Gonadorelin Acetate
- MF: C55H75N17O13
- MW: 1182.3
- CAS No: 33515-09-2
- Purity: >99%
- Appearance: White Powder
- Highlight: Human Growth Peptides Gonadorelin Acetate, White Powder Gonadorelin Acetate, Gonadorelin Acetate 5Mg

Product Description

White Powder Human Growth Hormone Peptide Gonadorelin Acetate 5Mg

Basic Information Form of Gonadorelin Acetate

Product Name	Gonadorelin Acetate
CAS NO.	33515-09-2
MF	C55H75N17O13
MW	1182.3
Appearance	White Powder
Product Purity	>99%
Stability	2 years

Brief Introduction of Gonadorelin Acetate

Gonadorelin is a drug that is naturally released from the hypothalamus of gonadotropin-releasing hormone (GnRH). GnRH causes the pituitary to release other hormones (luteinizing hormone [LH] and follicle stimulating hormone [FSH]). LH and FSH control child development and adult fertility.

Gonadorelin is used to test the operation of the hypothalamus and pituitary glands. In the case where the hypothalamus does not release enough GnRH, it can also be ovulated (the eggs are released from the ovaries) because there is no regular ovulation and menstrual period.

How does it work?

Gonadorelin is a hormone that is naturally produced by the hypothalamus in the brain. Also known as gonadotropin releasing hormone or GnRH.

Gonadorelin stimulates the pituitary to release sex hormone luteinizing hormone (LH) and follicle stimulating hormone (FSH). In women, FSH stimulates estrogen production and ovarian development. LH stimulates ovaries to release eggs (ovulation). In men, LH stimulates testis to produce hormone testosterone, FSH stimulates testis to produce sperm.

Gonadorelin was given by injection to check whether the pituitary gland was producing LH and FSH. This can help diagnose various hormonal disorders, including infertility, delayed adolescence and hypogonadism.

Function of Gonadorelin Acetate

Gonadorelin is a medicine that is the same as gonadotropin-releasing hormone (GnRH) that is naturally released from the hypothalamus gland. GnRH causes the pituitary gland to release other hormones (luteinizing hormone [LH] and follicle-stimulating hormone [FSH]). LH and FSH control development in children and fertility in adults.

Gonadorelin is used to test how well the hypothalamus and the pituitary glands are working. It is also used to cause ovulation (release of an egg from the ovary) in women who do not have regular ovulation and menstrual periods because the hypothalamus gland does not release enough GnRH. Gonadorelin may also be used for other conditions as determined by your doctor.

Package and Shipping of Gonadorelin Acetate

Package: 5mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of Gonadorelin Acetate

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q4: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
