

High Pure Human Growth Peptides Lyophilized Powders Gonadorelin For Men

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Gonadorelin
- Minimum Order Quantity: 5 box
- Price: US \$ 46-53/ box
- Packaging Details: 5mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 3000kg/Month

Product Specification

- Name: Gonadorelin For Men
- MF: C55H75N17O13
- CAS No: 33515-09-2
- MW: 1182.3
- Fineness: 99.5%
- Appearance: White Powder
- Highlight: **Lyophilized Powders Gonadorelin,
Human Growth Peptides Gonadorelin,
Lyophilized Powders For Men**

Product Description

High Pure Human Growth Hormone Peptide Lyophilized Powders Gonadorelin For Men

Basic Information Form of Gonadorelin For Men

Peptide Name	Gonadorelin For Men
CAS NO.	33515-09-2
MF	C55H75N17O13
MW	1182.3
Appearance	White Powder
Product Purity	99%
Shelf life	2 years

Brief Introduction of Gonadorelin For Men

Gonadorelin is a man-made protein that is like a hormone in the body called gonadotropin-releasing hormone (GnRH). GnRH is naturally released from the hypothalamus gland and is the key regulator of the reproductive axis. It causes the pituitary gland to release other hormones including luteinizing hormone (LH) and follicle-stimulating hormone (FSH) which are very important for the reproductive health and well-being in adults.

Hormones play an integral role in our overall health and Gonadorelin helps to maintain this vital balance. They are chemicals in our body that are produced by the endocrine glands to regulate functions like digestion, metabolism, mood, stress, and even reproduction. Minor changes in our hormones can have an impact on our overall health and functioning.

In men, hormonal imbalances are common in today's age because of the fast-paced lifestyles, poor food and exercise habits. They are more likely to experience hormone imbalance that drives male fertility. Fortunately, some male hormone imbalances can be successfully treated by injecting biologically identical replacement hormones known as Gonadorelin. Gonadorelin is a vital component of most TRT programs.

Signs of hormonal imbalance in men

- Gynecomastia or enlargement of the breast tissue.
- Loss of libido
- Erectile dysfunction
- Loss of muscle
- Mood changes
- Smaller testicles

Treatment and Uses of Gonadorelin For Men

1. It boosts the production of testosterone by the testes.

Low testosterone (male hypogonadism) is a condition in which the testes (testicles, the male reproductive glands) do not produce enough testosterone (a male sex hormone). As a man ages, the amount of testosterone in his body gradually drops. This natural decline starts after age 30 and continues (about 1% per year) throughout his life. Low testosterone can lead to several negative symptoms, including fatigue, erectile dysfunction, decreased sex drive, loss of lean muscle mass, and diminished hair growth.

Gonadorelin injection stimulates the pituitary gland so it releases Luteinizing hormones (LH). LH binds to receptors on Leydig cells, stimulating the synthesis and secretion of testosterone, thus, keeping your testosterone at optimal levels.

2. Gonadorelin is used to stimulate spermatogenesis or sperm production.

As a synthetic form of the hypothalamic gonadotrophin-releasing hormone, Gonadorelin also stimulates the synthesis and release of follicle-stimulating hormone (FSH) from the anterior pituitary gland. FSH acts directly on the Sertoli cells to stimulate germ cell numbers. It also acts indirectly to increase androgen production by the Leydig cells which helps maintain high levels of testosterone needed for the maintenance of spermatogenesis.

3. Gonadorelin helps with testicular atrophy.

In a normal and healthy young male, GnRH is released from the hypothalamus in a pulsatile manner about every two hours then the anterior pituitary responds to these pulses by releasing luteinizing hormone (LH) and follicle-stimulating hormone. Lastly, the testicles respond to these pulses by producing testosterone, estrogen, and sperm. Of course, this pathway is not working by the time a male patient seeks testosterone replacement therapy.

When on testosterone replacement therapy, the body may shut off its production of testosterone. This is because TRT can stop the production of gonadotropin-releasing hormone (GnRH). Without GnRH, the pituitary gland stops making luteinizing hormone (LH). Without LH, the testicles stop secreting testosterone, leading to the shrinking of testicles, and a reduction in fertility.

4. Prevents testicular shrinkage

Gonadorelin stimulates the anterior pituitary gland to release the luteinizing hormone (LH). Because of the hormonal stimulus of the LH, the testes are still capable of stimulating the synthesis and secretion of testosterone. This reverts the atrophy of the testicles.

Other Benefits of Gonadorelin Treatment

Gonadorelin does more than increase your fertility. In fact, it can affect your entire well-being. Gonadorelin treatment can:

Reverts testicular shrinkage exacerbated while on TRT.

Boosts your libido

Regulates and normalizes testosterone levels

Delays the testicular shrinkage from testosterone deficiency experienced with older men due to andropause.

helps increase sperm count and volume in men.

helps maintain fertility

Package and Shipping of Gonadorelin For Men

Package: 5mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of Gonadorelin For Men

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q4: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
