

CAS 33515-09-2 Pure Peptides Hgh Gonadorelin Acetate For Males

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Gonadorelin
- Minimum Order Quantity: 5 box
- Price: US \$ 46-52/ box
- Packaging Details: 5mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 3000kg/Month

Product Specification

- Name: Gonadorelin Acetate For Males
- MF: C55H75N17O13
- MW: 1182.3
- CAS No: 33515-09-2
- Purity: 99%
- Appearance: White Lyophilized Powder
- Highlight: 33515-09-2 Pure Peptides Hgh,
33515-09-2 Gonadorelin Acetate,
Hgh Gonadorelin Acetate

Product Description

CAS 33515-09-2 Human Growth Hormone Peptide Gonadorelin Acetate For Males

Basic Information Form of Gonadorelin Acetate For Males

Peptide Name	Gonadorelin Acetate For Males
CAS NO.	33515-09-2
MF	C55H75N17O13
MW	1182.3
Appearance	White Lyophilized Powder
Product Purity	99.5%
Shelf life	2 years

Brief Introduction of Gonadorelin Acetate For Males

Gonadorelin is used primarily for men who don't want to experience testicular shrinkage while they're on TRT and secondarily for men who want to maintain their fertility and ability to produce their own testosterone while they're on TRT. For men concerned about the size of their testicles, fertility and sperm count, and the amount of their ejaculate, we recommend gonadorelin not just to prevent or delay testicular shrinkage, but to specifically maintain their fertility.

Gonadorelin is bioidentical to gonadotropin releasing hormone (GnRH). In a normal and healthy young male, GnRH is released from the hypothalamus in a pulsatile manner about every two hours which then stimulates the anterior pituitary to release luteinizing hormone (LH) and follicle stimulating hormone (FSH). The testicles respond to these pulses by producing testosterone, sperm, and other ancillary hormones.

The comparison between Human Chorionic Gonadotropin (HCG) and Gonadorelin is highly debated. HCG works very well for most men, and gonadorelin is thought to have the same benefits when the dosage and frequency is properly administered. Human Chorionic Gonadotropin (HCG) was usually administered two to three times weekly to maintain testicular function and avoid atrophy. This frequency is unfortunately not effective with gonadorelin. Gonadorelin requires a daily (preferably nightly) subcutaneous injection.

Gonadorelin injections are prescribed once nightly before bed to ensure a significant amount of LH and FSH is released. The dose amount and dose frequency prescribed varies considerably from one male patient to the next. Patients must be aware that hormone therapy of any kind is a very individualized treatment. Dosage will depend on the responsiveness of their pituitary gland, the responsiveness of their testicles to their own luteinizing hormone (LH) and follicle stimulating hormone (FSH), how much the patient naturally aromatizes testosterone to estradiol, how much body fat the patient has and other lifestyle factors such as diet, exercise and sleep.

Most younger patients who are new to testosterone therapy and who are otherwise healthy will notice that gonadorelin will maintain testicular size and function. Patients who have been on TRT with Human Chorionic Gonadotropin (HCG) and were happy with the benefits they experienced from HCG will notice a slight decrease in testicular size which will subside over the first thirty to sixty days of treatment with gonadorelin. Patients who have been on TRT without HCG will notice that it may take one or two months or longer for gonadorelin to start to obviously work. It is important to note that Human Chorionic Gonadotropin (HCG) does not work for all men, and neither does gonadorelin.

Benefits of Gonadorelin Acetate For Males

Prevent testicular shrinkage: Gonadorelin stimulates the anterior pituitary gland to release the LH hormones. With this stimulation, the body can continue producing testosterone, reducing the risk of testicular atrophy, and can help with erectile dysfunction through Gonadorelin.

Treats lack of testicular development: In some instances, the male reproductive organ may not be developed entirely post-puberty. Gonadorelin helps stimulate this growth to full maturity.

Boost your libido: This supplement can increase your sexual health and performance.

Improves mood: Supporting your body with gonadorelin may cause you to have a clearer mind, focus and improved mood. Gonadorelin can work with testosterone levels to reduce depressive symptoms including apathy and lethargy.

Higher sleep quality: As gonadorelin works, you will notice your sleep quality improving as your hormones begin to balance. You can feel less restless at night and more alert throughout the day.

Regulate and normalize testosterone levels: These benefits occur as gonadorelin regulates testosterone, which offers another set of health improvements.

Package and Shipping of Gonadorelin Acetate For Males

Package: 5mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of Gonadorelin Acetate For Males

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q4: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
