

White Powder Sermorelin Peptide Hormones Bodybuilding 86168-78-7

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Sermorelin
- Minimum Order Quantity: 5 box
- Price: US \$ 36-41 / box
- Packaging Details: 2mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 3000kg/Month

Product Specification

- Name: Sermorelin Peptide
- CAS No.: 86168-78-7
- Molecular Formula: C149H246N44O42S
- Molecular Weight: 3357.9
- Peptide Purity: 99.6%
- Appearance: White Powder
- Shelf Life: 2 Years
- Highlight: **White Powder Sermorelin Peptide, Sermorelin Peptide Hormones Bodybuilding, 86168-78-7 Sermorelin Peptide**

Product Description

99% purity White Powder Sermorelin Peptide Hormones Bodybuilding 86168-78-7

Basic Information Form of Sermorelin Peptide

Product Name	Sermorelin Peptide
CAS NO.	86168-78-7
MF	C149H246N44O42S
MW	1024.2
Appearance	White Powder
Peptide Purity	99.4%
MOQ	5box
Shelf life	2 years

What Is Sermorelin Peptide

Sermorelin is a GHRH (growth hormone-releasing hormone) peptide analogue. Its peptide sequence is comprised of 29 amino acids. This sequence is a portion of the endogenous human GHRH, and is currently considered to be the shortest synthetic peptide that possesses the full array of functional GHRH activity. Due to this fact, sermorelin is considered to be a growth hormone secretagogue.

Sermorelin has been used during research to stimulate the secretion of growth hormone from the adenohypophysis (also called the anterior pituitary). The anterior pituitary secretes trophic hormones. Sermorelin has also been used in research stimulation tests to assess for pituitary sufficiency in relation to the secretion of the growth hormone.

Sermorelin(GHRH), Also known as Sermorelin Acetate,GRF 1-29, is a bio-identical hormone that has recently been genetically engineered to stimulate the secretion of Hormone Releasing Hormone (GHRH) from the hypothalamus, a gland adjacent to the pituitary gland.

GHRH is a peptide that contains the first 29 amino acids of our own GH. These 29 amino acids are the active amino acids of GHRH. It is GHRH that stimulates the pituitary glands to release GH. As we get older, the hormones produced by the anterior pituitary are depleted. It has now been shown that GHRH can restore the GH-RNA to a youthful level causing elevation of levels of IGF-1.

Applications Of Sermorelin Peptide

1.Sermorelin is a synthetic (man-made) version of a naturally occurring substance that causes release of growth hormone from the pituitary gland. Growth hormone is naturally produced by the pituitary gland and is necessary for growth in children. In children who fail to grow normally because their bodies are not producing enough growth hormone, this medicine may be used to increase the amount of growth hormone produced by the pituitary gland.

Sermorelin is used to treat growth problems (usually in children) due to growth hormone deficiency. It works by stimulating the pituitary gland to release more natural growth hormone.

2.The empirical data of sermorelin is as follows - formula corresponding to "C 149 H 246 N 44 O 42 S" and exact molecular weight corresponding to 3,358 atomic mass units. Sermorelin acetate itself is a powder, but combined with Sodium Chloride Injection (USP) it becomes suitable for injection. Naturally it has a pH balance of 5-5.5, a bit on the acidic side. For this reason it is balanced out with a dibasic solution of sodium phosphate and monobasic sodium phosphate buffer.

The scientific description of sermorelin acetate is quite complicated to say the least, but its use is simple - to stimulate the pituitary gland for the release of the human growth hormone. The human growth hormone is natural to a healthy functioning organism in decent doses throughout life. Unfortunately, some people grow to be deficient of it with age or injury; meanwhile others may lack it even as a child. Usage of sermorelin acetate as a human growth hormone replacement therapy is common to men, women, and children alike.

How to use sermorelin Peptide?

Use sermorelin peptide as directed by your doctor. Check the label on the medicine for exact dosing instructions.

Sermorelin peptide is usually administered as an injection at your doctor's office, hospital, or clinic. If you are using sermorelin acetate at home, carefully follow the injection procedures taught to you by your health care provider.

If sermorelin peptide contains particles or is discolored, or if the vial is cracked or damaged in any way, do not use it.

Do not shake sermorelin acetate when mixing.

Use sermorelin peptide immediately after mixing. Discard any unused medicine.

All other hormone therapy should be stopped 1 week before using sermorelin peptide. Contact your doctor or pharmacist if you have questions.

Keep this product, as well as syringes and needles, out of the reach of children and away from pets. Do not reuse needles, syringes, or other materials. Dispose of properly after use. Ask your doctor or pharmacist to explain local regulations for proper disposal.

If you miss a dose of sermorelin peptide, use it as soon as possible. If it is almost time for your next dose, skip the missed dose and go back to your regular dosing schedule. Do not use 2 doses at once.

Package and Shipping of Sermorelin Peptide

Package: 2mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of Sermorelin Peptide

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q4: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
