

Strength Enhancement Hormones Sermorelin Acetate Bodybuilding CAS 86168-78-7

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Sermorelin
- Minimum Order Quantity: 5 box
- Price: US \$ 37-42 / box
- Packaging Details: 2mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 3000kg/Month

Product Specification

- Name: Sermorelin Acetate
- CAS No.: 86168-78-7
- Molecular Formula: C149H246N44O42S
- Molecular Weight: 3357.9
- Peptide Purity: 99.7%
- Appearance: White Powder
- Shelf Life: 2 Years
- Highlight: Hormones Sermorelin Acetate Bodybuilding, Strength Enhancement Sermorelin Acetate Bodybuilding, 86168-78-7 Sermorelin Acetate Bodybuilding

Product Description

Strength Enhancement Hormones Bodybuilding Sermorelin Acetate CAS 86168-78-7

Basic Information Form of Sermorelin Acetate

Product Name	Sermorelin Acetate
CAS NO.	86168-78-7
Molecular Formula	C149H246N44O42S
Molecular Weight	1024.2
Appearance	White Powder
Purity	99.7%
Stability	2 years

Brief Introduction of Sermorelin Acetate

Sermorelin works as a clean GHRH. The problem for the bodybuilder or athlete is that it has a very short half-life of about ten (10) minutes. This becomes an unattractive feature when compared to the half-life of MOD GRF (1-29) (CJC1295 without DAC), which comes in around 30 minutes. Despite its short window, it does bind quite effectively to the pituitary receptors. The other main down side associated with its very short half life is that it is quickly broken down by blood enzymes within minutes. This is why a GHRH peptide with a half life of 30 minutes or longer is desirable, since it will survive the blood enzyme death and allow it to circulate the body looking for hormone receptors to bind to.

In order to provide the greatest benefit from naturally secreted HGH, we compound Sermorelin with GHRP-6 (Growth Hormone Releasing Hexipeptide). In addition to the positive functions of Sermorelin outlined above, GHRP-6 is a secretagogue (which means that it causes another substance to be secreted in the body) which also encourages the pituitary gland to secrete HGH. GHRP-6 also acts on the hypothalamus to cause the HGH to be secreted in natural waves just like it was when your body produced it naturally in abundant quantities.

Functions of Sermorelin Acetate

- increased lean body mass
- reduced fat
- increased strength
- improved recovery
- better sleep
- strengthening of the heart
- enhancing of the immune system
- increases IGF-1 production
- anti-aging peptide
- Sermorelin's ability to increase IGF-1 in the blood stream will only further increase the function of the metabolism and the growth of new cells in muscles, bones and organs

Package and Shipping of Sermorelin Acetate

Package: 2mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of Sermorelin Acetate

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q4: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
