

## CAS 315-37-7 Test Enanthate cycle Injectable Steroid Powder

### Our Product Introduction

for more products please visit us on [peptide-powder.com](http://peptide-powder.com)

#### Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone Enanthate
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febr Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

#### Product Specification

- Product: Testosterone Enanthate
- Apperance: White Powder
- Cas No.: 315-37-7
- MF: C<sub>26</sub>H<sub>40</sub>O<sub>3</sub>
- MW: 400.6
- Purity: 99%min
- MOQ: 1KG
- Highlight: **315-37-7 Test Enanthate Cycle, 315-37-7 Injectable Steroid Powder, Injectable Test Enanthate Cycle**

## Product Description

### High Quality Testosterone Enanthate Injectable Steroid Powder CAS 315-37-7

#### Brief Introduction Of Testosterone Enanthate

The Enanthate ester causes the release of this drug into the blood to occur more slowly than some other esters and therefore requires injections to be less frequent - it is therefore ideal for beginners who are just getting used to their idea of self administration via Injection. The half-life of the drug is such that a once a week injection can be used, but will cause Testosterone level fluctuations in the blood and therefore twice weekly is more suited. Fluctuating Testosterone levels increase the incidence of various side effects and should be avoided.

This Compound has a low melting point and so during warmer months one may expect the Compound to arrive in a partially melted/melted or set state. This does not affect the potency of the end product or the production process.

Testosterone enanthate is an ester of testosterone which is used for the treatment in males to treat primary hypogonadism (congenital or acquired) — testicular failure due to cryptorchidism, bilateral torsion, orchitis, vanishing testis syndrome, or orchidectomy.

Testosterone 250 USP injection provides testosterone enanthate, a derivative of the principal endogenous androgen testosterone, for intramuscular administration. The esterification of the 17 — beta -hydroxyl group increases the duration of the action of testosterone. Testosterone esters in oil injected intramuscularly are absorbed slowly from the lipid phase, thus Testosterone 250 can be administered at intervals of 1 -2 weeks.

Testosterone 250 contains testosterone enanthate in a 10ml solution for injection (250mg testosterone enanthate / ml). Testosterone 250 is a clear, yellowish oily solution for intramuscular injection.

#### Basic Information form Of Testosterone Enanthate:

|                   |                                                |
|-------------------|------------------------------------------------|
| Product Name      | Testosterone Enanthate                         |
| Cas No.           | 315-37-7                                       |
| Assay             | 99%                                            |
| Appearance        | White powder                                   |
| Molecular Formula | C <sub>26</sub> H <sub>40</sub> O <sub>3</sub> |
| Molecular Weight  | 400.6                                          |
| Melting point     | 34 ~ 39°                                       |

#### Application Of Testosterone Enanthate:

The usual dosage would be in the range of 250mg-750mg a week. This level is quite sufficient, and should provide the user a rapid gain of strength and body weight. Above this level estrogenic side effects will no doubt become much more pronounced, possibly outweighing any new muscle gained.

Testosterone enanthate best popular steroid hormone, Pharmaceutical material .Clinically for the treatment of male sexual function decline, aplastic anemia and other illnesses .As a male hormone and anabolic hormones. Bodybuilder , Sport Player, Muscle Building Humans , GYM, Fitness Club, Pharm Company, Pharm Lab. Testosterone Enanthate is one of the most commonly used testosterone for the treatment of low testosterone. It is also extremely popular in performance enhancing circles. This is one of the most affordable anabolic steroids on the market, it's highly versatile, tolerated well by most all adult men and its supply is through the roof.

Those looking for greater bulk would be better served by adding an oral like Anadrol or Dianabol, combinations which prove to work great. If one wishes to use a testosterone yet retain a level of quality and definition to the physique, an injectable anabolic like Deca Durabolin or Equipoise may prove to be a better choice. Here we can use a lower dosage of enanthate, so as to gain an acceptable amount of muscle but keep the buildup of estrogen to a minimum.

With the proper administration of ancillary drugs, Nolvadex/Clomid , during post cycle recovery, much of the new muscle mass can be retained for a long time after the cycle has been stopped.

Testosterone Enanthate, Once injected, the testosterone does not become active until the ester begins to detach from the hormone. The total

detachment does not happen all at once but allows for a slow, steady release of the active hormone into the body. Once injected, there will be a sharp spike in testosterone within the first 24-48 hours post injection. From here the hormone will continually separate and dissipate through the body. By its time frame, Testosterone Enanthate carries a half-life of approximately 8 days, which will allow for as little as one injection every 2 weeks in a therapeutic setting. However, every 7-10 days will prove far more effective in maintaining stability.

Testosterone Enanthate, As is with all testosterone hormones, Testosterone Enanthate carries an anabolic rating of 100 and an androgenic rating of 100. The testosterone hormone is the basis by-which all ratings of all anabolic steroids are measured. And unlike the ratings of some steroids, testosterone's translate perfectly from its structural nature to functional basis. This hormone will present high levels of anabolic and androgenic activity.

#### **Package and Shipping Of Testosterone Enanthate:**

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

#### **Shipping:**

With 3-5 days after your payment

#### **FAQ Of Testosterone Enanthate:**

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
