

CAS No 315-37-7 Test E Cycle Raw Steroid Powder Muscle Gain

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBV-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febre Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product: Testosterone Enanthate
- MF: C₂₆H₄₀O₃
- MW: 400.6
- Cas No.: 315-37-7
- Apperance: White Powder
- Melting Point: 34-39°C
- Fineness: 99%
- Storage Temp: 2-8°C
- Highlight: 315-37-7 Test E Cycle,
Test E Cycle Steroid Powder,
Test E Cycle Muscle Gain

Product Description

Test E Testosterone Enanthate Raw Steroid Powder Muscle Gain CAS 315-37-7

What Is Testosterone Enanthate

Testosterone Enanthate is one of the most popular used testosterone products on the market today. It is very effective in building muscle, burning fat and gaining strength. It is also cheap and easy to obtain. Testosterone is the male sex hormone responsible for many of the physical and emotional traits of men. It creates the deeper voices, sex drive, aggression and, of course, larger muscles in men. Testosterone makes the muscles retain more nitrogen, which in turn makes the muscle synthesize proteins better, producing larger muscles.

Testosterone enanthate is an oil based injectable steroid, designed to slowly release testosterone from the injection site (depot). Once administered, serum concentrations of this hormone will rise for several days, and remain markedly elevated for approximately two weeks. It may actually take three weeks for the action of this drug to fully diminish. For medical purposes this is the most widely prescribed testosterone, used regularly to treat cases of hypogonadism and other disorders related to androgen deficiency. Since patients generally do not self-administer such injections, a long acting steroid like this is a very welcome item. Therapy is clearly more comfortable in comparison to an ester like propionate, which requires a much more frequent dosage schedule.

Testosterone is a powerful hormone with notably prominent side effects. Much of which stem from the fact that testosterone exhibits a high tendency to convert into estrogen. Related side effects may therefore become a problem during a cycle.

Being a testosterone product, all the standard androgenic side effects are also to be expected. Oily skin, acne, aggressiveness, facial/body hair growth and male pattern baldness are all possible. Older or more sensitive individuals might therefore choose to avoid testosterone products, and look toward milder anabolics like DecaDurabolin or Equipoise which produce fewer side effects. Others may opt to add the drug Proscar/Propecia, which will minimize the conversion of testosterone into DHT (dihydrotestosterone). With blood levels of this metabolite notably reduced, the impact of related side effects should also be reduced. With strong bulking drugs however, the user will generally expect to incur strong side effects and will often just tolerate them. Most athletes really do not find the testosterones all that uncomfortable (especially in the face of the end result), as can be seen with the great popularity of such compounds.

Although this particular ester is active for a much longer duration, most prefer to inject it on a weekly or bi-weekly basis in order to keep blood levels stable. The usual dosage would be in the range of 250mg-750mg a week. This level is quite sufficient, and should provide the user a rapid gain of strength and body weight. Above this level estrogenic side effects will no doubt become much more pronounced, possibly outweighing any new muscle gained. Those looking for greater bulk would be better served by adding an oral like Anadrol or Dianabol, combinations which prove to work great. If one wishes to use a testosterone yet retain a level of quality and definition to the physique, an injectable anabolic like Deca Durabolin or Equipoise may prove to be a better choice. By using a lower dosage of enanthate, so as to gain an acceptable amount of muscle but keep the buildup of estrogen to a minimum.

With the proper administration of ancillary drugs, Nolv/Clomid and HCG, during post cycle recovery, much of the new muscle mass can be retained for a long time after the cycle has been stopped.

Basic Information form Of Testosterone Enanthate:

Product Name	Testosterone Enanthate
Cas No.	315-37-7
Purity	99%
Appearance	White powder
Chemical Formula	C ₂₆ H ₄₀ O ₃
MW	400.6
Storage Temp	2-8°C
Melting point	34 ~ 39°
Shelf life	2 years

Application Of Testosterone Enanthate

1. Testosterone Enanthate is imperative and effective for enhancing males specific sexual traits. It is the principle male sex hormone and an anabolic steroid. Testosterone Enanthate plays a key role in the development of male reproductive tissue such as the testis and prostates.
2. Testosterone Enanthate is used to improve testosterone deficiencies such as hypogonadism and sexual dysfunction with limited side effects.
3. Testosterone is essential for health and well-being as well as the prevention of osteoporosis
It enhances libido, increases energy ,promotes fat loss, as well as boosts immunity. Testosterone aids in gaining and preserving lean muscle mass. It prevents against bone loss as well as heart disease.
4. Testosterone Enanthate a long acting form of the parent hormone testosterone. In this particular case, the parent hormone has been attached to the Enanthate ester to delay its release into the bloodstream over several days.

Package and Shipping Of Testosterone Enanthate:

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

Shipping:

With 3-5 days after your payment

FAQ Of Testosterone Enanthate:

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
