

99% Purity Test E Bodybuilding Steroid Powder Testosterone Enanthate 250mg

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febré Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product: Testosterone Enanthate 250mg
- Molecular Formula: C₂₆H₄₀O₃
- Molecular Weight: 400.6
- Cas No.: 315-37-7
- Purity: 99%MIN
- Appearance: White Powder
- Melting Point: 34-39°C
- Storage Temp: 2-8°C
- Shelf Life: 2 Years
- Highlight: 99% Test E Bodybuilding,
Test E Bodybuilding Steroid Powder,
99% Testosterone Enanthate 250mg

Product Description

99% Purity Test E Bodybuilding Steroid Powder Testosterone Enanthate 250mg

Basic Information form Of Testosterone Enanthate 250mg:

Product Name	Testosterone Enanthate 250mg
Cas No.	315-37-7
Purity	99%MIN
Appearance	White powder
Molecular Formula	C ₂₆ H ₄₀ O ₃
Molecular Weight	400.6
Storage Temp	2-8°C
Melting point	34 ~ 39°
Shelf life	2 years

What Is Testosterone Enanthate 250mg:

Testosterone Enanthate (Primoteston) is one of the most popular used testosterone products on the market today. It is very effective in building muscle, burning fat and gaining strength. It is also cheap and easy to obtain. Testosterone is the male sex hormone responsible for many of the physical and emotional traits of men. It creates the deeper voices, sex drive, aggression and, of coarse, larger muscles in men. Testosterone makes the muscles retain more nitrogen, which in turn makes the muscle synthesize proteins better, producing larger muscles.

Testosterone Enanthate (Primoteston) is an oil based injectable steroid, designed to slowly release testosterone from the injection site (depot). Once administered, serum concentrations of this hormone will rise for several days, and remain markedly elevated for approximately two weeks. It may actually take three weeks for the action of this drug to fully diminish. For medical purposes this is the most widely prescribed testosterone, used regularly to treat cases of hypogonadism and other disorders related to androgen deficiency. Since patients generally do not selfadminister such injections, a long acting steroid like this is a very welcome item. Therapy is clearly more comfortable in comparison to an ester like propionate, which requires a much more frequent dosage schedule.

Although this particular ester is active for a much longer duration, most prefer to inject it on a weekly or bi-weekly basis in order to keep blood levels stable. The usual dosage would be in the range of 250mg-750mg a week. This level is quite sufficient, and should provide the user a rapid gain of strength and body weight. Above this level estrogenic side effects will no doubt become much more pronounced, possibly outweighing any new muscle gained. Those looking for greater bulk would be better served by adding an oral like Anadrol or Dianabol, combinations which prove to work great. If one wishes to use a testosterone yet retain a level of quality and definition to the physique, an injectable anabolic like Deca Durabolin or Equipoise may prove to be a better choice. By using a lower dosage of enanthate, so as to gain an acceptable amount of muscle but keep the buildup of estrogen to a minimum.

With the proper administration of ancillary drugs, Nolv/Clomid and HCG, during post cycle recovery, much of the new muscle mass can be retained for a long time after the cycle has been stopped.

Applications Of Testosterone Enanthate 250mg:

1. Testosterone Enanthate (Primoteston) is imperative and effective for enhancing males specific sexual traits. It is the principle male sex hormone and an anabolic steroid. Testosterone Enanthate plays a key role in the development of male reproductive tissue such as the testis and prostates.
2. Testosterone Enanthate (Primoteston) is used to improve testosterone deficiencies such as hypogonadism and sexual dysfunction with limited side effects.
3. Testosterone is essential for health and well-being as well as the prevention of osteoporosis. It enhances libido, increases energy, promotes fat loss, as well

as boosts immunity. Testosterone aids in gaining and preserving lean muscle mass. It prevents against bone loss as well as heart disease.

4. Testosterone Enanthate (Primoteston) a long acting form of the parent hormone testosterone. In this particular case, the parent hormone has been attached to the Enanthate ester to delay its release into the bloodstream over several days.

Package and Shipping Of Testosterone Enanthate 250mg:

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

Shipping:

With 3-5 days after your payment

FAQ Of Testosterone Enanthate 250mg :

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
