

## Ethanate Testosterone Powder Anabolic Steroid Test E For Body Building

### Our Product Introduction

for more products please visit us on [peptide-powder.com](http://peptide-powder.com)

#### Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febr Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

#### Product Specification

- Product Name: Testosterone Ethanate
- Cas No.: 315-37-7
- Molecular Formula: C<sub>26</sub>H<sub>40</sub>O<sub>3</sub>
- Molecular Weight: 400.6
- Purity: 99%MIN
- Apperance: White Powder
- Storage Temp: 2-8°C
- Melting Point: 34-39°C
- Shelf Life: 2 Years
- Highlight: **Ethanate Testosterone Powder, Anabolic Steroid Test E, Test E For Body Building**

## Product Description

### Testosterone Enanthate Testosterone Anabolic Steroid Powder Test E for Body Building

#### Basic Information form Of Testosterone Enanthate:

|                   |                                                |
|-------------------|------------------------------------------------|
| Product Name      | Testosterone Enanthate                         |
| Cas No.           | 315-37-7                                       |
| Purity            | 99%MIN                                         |
| Molecular Formula | C <sub>26</sub> H <sub>40</sub> O <sub>3</sub> |
| Molecular Weight  | 400.6                                          |
| Appearance        | White powder                                   |
| Melting point     | 34 ~ 39°                                       |
| Shelf life        | 2 years                                        |

#### What Is Testosterone Enanthate:

Testosterone Heptanoate is one of the most popular testosterone products on the market today. It is very effective in building muscle, burning fat and gaining strength. It is also very cheap and easy to get.

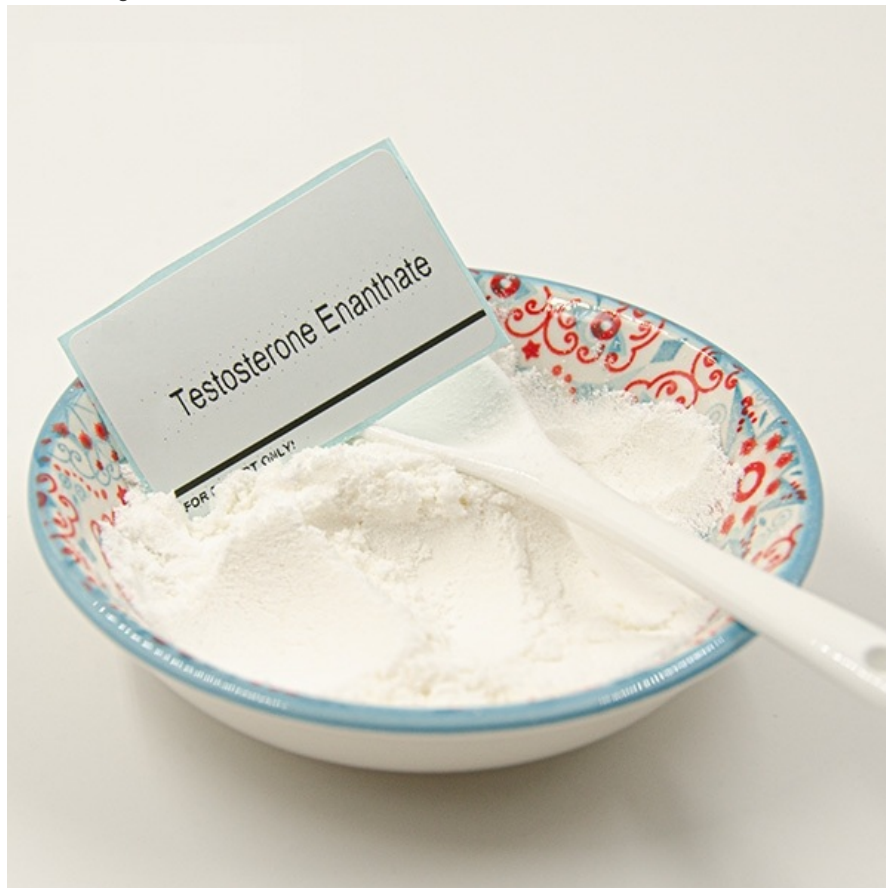

The test is male sex hormones responsible for many people's physical and emotional traits. It creates deeper voice, sexual desire, aggression, and roughness, bigger muscles in men. The test keeps the muscle more nitrogen, which in turn makes the muscle better synthesize the protein, producing more muscle.

The disadvantage of testing steroids is that they are aromatic in the body or become estrogen. When the body has too much estrogen, it begins to bear female characteristics, female breast development, water retention, fat gain, loss of libido and testicular contraction is the most definite side effect of taking testis and making it in vivo.

Testosterone heptanoate is an oily injectable steroid designed to slowly release testosterone from the site of injection (reservoir). Once administered, the serum concentration of the hormone will rise for several days and remain significantly elevated for about two weeks. The effect of this drug may take three weeks to completely disappear. For medical purposes, this is the most extensive prescription test that is regularly used to treat cases of hypogonadism and other disorders associated with androgen deficiency. Since the patient usually does not self-inject this injection, such long-acting steroids are very popular items. Compared with the ester propionate, the treatment is clearly more comfortable, which requires a more frequent dose regimen.

The test is a strong hormone that has significant significant side effects. Many of which are due to the fact that the test shows a tendency to convert to estrogen. The associated side effects may therefore be a problem during the cycle.

#### Applications Of Testosterone Enanthate:

Testosterone Heptanoate is one of the most popular testosterone in the world. Testosterone heptanoate Ester is a very concentrated form of hormone material, which is why it can improve the level of testosterone in the body very quickly. Athletes take exogenous testosterone to

increase muscle strength and size. The results show that weekly injections of hormones reduce waist circumference and body weight. Supplemental use also improves male sexual performance.

Treatment was considered safe because no malignancy was observed during the biopsy. The use of testosterone heptanoate is a very effective way to increase the production of testosterone in the body. In addition, it also benefits athletes and body builders because they can develop muscle mass quickly to be able to perform the greatest performance.

Testosterone heptanoate is best suited for muscle builders and athletes seeking to gain efficiency to improve drug advantage without serious adverse reactions.

#### **Package and Shipping Of Testosterone Ethanoate:**

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

#### **Shipping:**

With 3-5 days after your payment

#### **FAQ Of Testosterone Ethanoate :**

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.
