

High Purity Bodybuilding Steroid Hormone Test Enanthate 315-37-

7

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febr Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product Name: Test Enanthate
- Molecular Formula: C₂₆H₄₀O₃
- Cas No.: 315-37-7
- Molecular Weight: 400.6
- Purity: 99%
- Apperance: White Powder
- Melting Point: 34-39°C
- Storage Temp: 2-8°C
- Shelf Life: 2 Years
- Highlight: **High Purity Bodybuilding Steroid Hormone, High Purity Hormone Test Enanthate, 315-37-7 Hormone Test Enanthate**

Product Description

High Purity Bodybuilding Steroid Hormone Test Enanthate 315-37-7

Basic Information form Of Test Enanthate:

Product Name	Test Enanthate
Cas No.	315-37-7
Purity	99%
MF	C ₂₆ H ₄₀ O ₃
MW	400.6
Appearance	White powder
Melting point	34 ~ 39°
Shelf life	2 years

What Is Test Enanthate:

Testosterone Enanthate Injection, USP is indicated for replacement therapy in conditions associated with a deficiency or absence of endogenous testosterone.

1. Primary hypogonadism (congenital or acquired) - Testicular failure due to cryptorchidism, bilateral torsion, orchitis, vanishing testis syndrome, or orchidectomy.

2. Hypogonadotropic hypogonadism (congenital or acquired) - Gonadotropin or luteinizing hormone-releasing hormone (LHRH) deficiency, or pituitary-hypothalamic injury from tumors, trauma, or radiation. (Appropriate adrenal cortical and thyroid hormone replacement therapy are still necessary, however, and are actually of primary importance.)

If the above conditions occur prior to puberty, replacement therapy will be needed during the adolescent years for development of secondary sexual characteristics. Prolonged treatment will be required to maintain sexual characteristics in these and other males who develop testosterone deficiency after puberty.

Safety and efficacy of Testosterone Enanthate Injection, USP in men with age-related hypogonadism have not been established.

Product Image Of Test Enanthate:

Applications Of Test Enanthate:

Single ester of testosterone with very similar half-life to testosterone cypionate allowing stable levels.

Some Testosterone enanthate formulations (some do contain arachis oil) contain Castor Oil (in UK and European formulations) allowing peanut allergy sufferers to have the option of testosterone enanthate instead of Sustanon (that contains arachis oil).

In Europe Testosterone enanthate supply is more easily accessible through pharmacies making better continuity of supply

Like Testosterone Cypionate, it does not have to be injected every day or every other day like propionate but can be injected at a frequency of 3-7 days.

In Europe Testosterone Enanthate comes in single use ampoules which allows for lower infection risk in comparison to multi-dose vials.

Package and Shipping Of Test Enanthate:

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

Shipping:

With 3-5 days after your payment
