

Muscle Enhance Raw Testosterone Cypionate Powder Bulking Cycles Steroids

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febr Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product: Testosterone Cypionate
- Cas No.: 58-20-8
- Molecular Formula: C₂₇H₄₀O₃
- Molecular Weight: 412.60
- Purity: 99%
- Appearance: White Powder
- Melting Point: 98.5-104°C
- Shelf Life: 2 Years
- Highlight: Muscle Enhance Raw Testosterone Cypionate Powder
, Bulking Raw Testosterone Cypionate Powder,
Muscle Enhance test cyp powder

Product Description

Muscle Enhance Bulking Cycles Steroids Testosterone Cypionate Powder

Basic Information form Of Testosterone Cypionate:

Product Name	Testosterone Cypionate
Cas No.	58-20-8
Purity	>99%
Appearance	White powder
Molecular Formula	C ₂₇ H ₄₀ O ₃
Molecular Weight	412.60
Melting point	98.5-104°C
Shelf life	2 years

What Is Testosterone Cypionate:

Testosterone Cypionate is a synthetic version of the naturally produced testosterone hormone. This hormone is responsible for many different physical and mental characteristics in males. It promotes sex drive, fat loss, helps with gaining and maintaining lean muscle mass, increases bone density, and may even protect against heart disease. Whether it is naturally produced or through the use of Testosterone Cypionate, these traits do not change. All other steroids are actually the testosterone molecule that has been altered to change the properties of the hormone.

Testosterone Cypionate carries a rating of 100 when measuring its anabolic/androgenic structure and this rating is used to measure all other steroids. This would make testosterone the "father" of all anabolic steroids used by athletes today. It should be noted; all testosterone compounds, including Testosterone Cypionate carry this anabolic/androgenic score of 100, as they are all merely testosterone

Testosterone cypionate is a long-acting version of the parent hormone testosterone with an attached cypionate ester to delay its release into the body. Testosterone is the most potent, naturally occurring androgen that is formed in the human body. It is responsible for characteristics specific to males and their sexual traits.

Before the scheduling of anabolics in the U.S., this was the most common form of testosterone available to athletes. Cyp had gained a reputation as being slightly stronger than Enanthate and became the testosterone of choice for many. Now that anabolics are controlled, this is an almost impossible find. In general, the only versions you'll find on the black market are Sten from Mexico, which contains 75mg cyp with 25 mg propionate along with some DHEA, and Testex from Leo in Spain which contains 250mg cypionate is a light resistant ampoule. All versions of Upjohn and Steris in multi-dose vials should be looked at with extreme caution as they are very difficult to get on the black market. Counterfeits are quite easy to obtain. Real Steris products have the inking STAMPED into the box and the labels cannot be removed from the bottle. Any variation of that is definitely counterfeit. A running dosage of test cypionate is generally in the range of 200-600mg per week.

Product Image Of Testosterone Cypionate:

Application:

Testosterone is an original anabolic steroid and is endogenously produced naturally in all human species and most animals.

Testosterone Cypionate Cycles:

Regardless of the purpose of the cycle, regardless of whether it is torn or not, testosterone cypionate is usually used and stacked along with other anabolic steroids with very similar properties for obvious reasons. It is a common companion of compounds such as decanodotate decanoate, and it is usually administered at the same length from 10 to 12 weeks as testosterone cypionate, and kickstart compounds such as dianabol are usually about 4. Beginning of the cycle until it is canceled on a weekly or The sixth week,

Dosage:

For bodybuilding and improving performance, testosterone cypionate is usually administered in the form of an initial dosage range of approximately 300-500 mg once a week. The dosage of mild testosterone cypionate is often in the range of 500 to 750 mg per week, and experienced users are known to administer more than 1000 mg of testosterone cypionate per week.

Package and Shipping Of Testosterone Cypionate:

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

Shipping:

With 3-5 days after your payment

**FAQ Of Testosterone Cypionate :**

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
