Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febré Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product: Buy Testosterone Cypionate
- Cas No.: 58-20-8
- Molecular Formula: C₂₇H₄₀O₃
- Molecular Weight: 412.60
- Appearance: White Crystalline Powder
- Fineness: 99%
- Shelf Life: 2 Years
- Highlight: Test Cyp For Bodybuilding, 58-20-8 Test Cyp, Testosterone Powder Test Cyp

Product Description

Buy Testosterone Cypionate Testosterone Anabolic Steroid Powder Test Cyp For Bodybuilding

Basic Information form Of Buy Testosterone Cypionate:

Product Name	Buy Testosterone Cypionate
Cas No.	58-20-8
Fineness	99%
Appearance	white crystalline powder
MF	C ₂₇ H ₄₀ O ₃
MW	412.60
Shelf life	2 years

What Is Buy Testosterone Cypionate:

Testosterone cypionate is a steroid hormone from the androgen and is found in mammals and other vertebrates, testosterone cypionate is primarily secreted in the tests of mails and the ovaries of female, although small amount are also secreted by the adrenal glands, testosterone cypionate is the principle male sex hormone and an anabolic steroid.

Testosterone Cypionate is the longest-estered testosterone available today. It has a half-life in the body of 15 to 16 days and is found as injectable oil. Because it reacts in the body for so long, it can cause more water retention than other steroids and is best used as bulking compound in a stack. Endogenous androgens are responsible for normal growth and development of the male sex organs and for maintenance of secondary sex characteristics. These effects include growth and maturation of the prostate, seminal vesicles, penis, and scrotum; development of male hair distribution, such as beard, pubic, chest, and axillary hair; laryngeal enlargement, vocal cord thickening, and alterations in body musculature and fat distribution. Drugs in this class also cause retention of nitrogen, sodium, potassium, and phosphorous, and decreased urinary excretion of calcium. Androgens have been reported to increase protein anabolism and decrease protein catabolism. Nitrogen balance is improved only when there is sufficient intake of calories and protein.
