

Bodybuilding Anabolic Steroids Test Cyp Powder For Muscle Building

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febré Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product: Test Cyp
- Cas No.: 58-20-8
- Molecular Weight: 412.60
- Molecular Formula: $C_{27}H_{40}O_3$
- Fineness: 99%
- Appearance: White Powder
- Shelf Life: 2 Years
- Highlight: **Anabolic Steroids Test Cyp Powder, Bodybuilding Test Cyp Powder, Muscle Building Test Cyp Powder**

Product Description

Bodybuilding Anabolic Steroids Testosterone Cypionate Test Cyp For Muscle Building

Basic Information form Of Test Cyp:

Product Name	Test Cyp
Cas No.	58-20-8
Purity	99%
Appearance	white crystalline powder
MF	C ₂₇ H ₄₀ O ₃
MW	412.60
Shelf life	2 years

What Is Test Cyp:

Testosterone testosterone is a testosterone that is popular around the world and is commonly used for hormone replacement therapy. Because it is also used as a powerful androgen and anabolic hormone, it can be used for almost anything that is effective and efficient for all numbers. In general, testosterone Cypionate can increase the quality of red blood cells and the production of IGF-1 in the body, increase muscle retention in the muscles, and reduce the body's muscle consumption of hormones. This makes it more synthetic anabolic effect in enhancing human performance. Athletes claim that testosterone produces significant size and strength increases. Testosterone Cypionate brings the benefits of a ton, which can provide a person who wants everything from the anabolic steroids out. The goal of most users of synthetic metabolic steroids is to increase their size and intensity in a significant way, which is provided by testosterone Cypionate. In addition, because the testosterone Cypionate has a positive effect on muscle wasting hormone, this increase in lean tissue can improve the metabolic rate of human, this steroid can effectively reduce body fat.

American athletes have a long and loving relationship with testosterone cyclopentamate. Although testosterone heptanoate is widely produced worldwide, cyclopentanepropanoate is almost an American project. Therefore, it is not surprising that American athletes particularly like this testosterone.

But many people claim that this is not just a simple pride, often advocating cyclopentionic acid is a superior product that offers a little "heptanoic acid" more than "heptanoic acid". At the same time, it is said to produce a slightly higher water retention level, but not enough to make it easy to distinguish.

Of course, when we look at this situation objectively, we see that these two steroids are really interchangeable, and cyclopentionic acid is not superior. Both are long-acting oil-based injections, which will keep testosterone levels fully elevated for about two weeks. The heptanoate may be slightly better in terms of testosterone release because the ester is lighter than carbon carbonate (remember that the ester is calculated in the total weight of the steroid). The difference is so insignificant, but no one can rightly claim it is obvious (we might say a few milligrams per lens). In any case, cyclopentamate is the most popular testosterone ester in the US black market for a long time.

Like all testosterone injections, it is expected that a considerable gain in muscle mass and intensity during a cycle. As testosterone reading is converted to estrogen, the quality obtained from this drug may be accompanied by considerable water retention. The resulting loss caused by course makes the cyclopentamate in the diet or cutting stage is very poor choice.

This drug-induced estrogen excess level can also cause a fairly rapid development of men's breast development. If you notice nipple discomfort under the nausea, swelling or lumps, should immediately add adjuvant drugs such as Nolvadex. This will greatly reduce the role of estrogen, making steroids easier to use.

The powerful anti-aromatase Arimidex, Femara or Aromasin is still a better choice. Those who have known sensitivity to estrogen may find it useful to use adjuvant drugs such as Nolvadex and Proviron from the cycle in order to prevent estrogen-related side effects before they become apparent.

Treatment of men with low testosterone symptoms when the body does not produce any testosterone or does not have enough testosterone (hypogonadism). It can also be used for other conditions that your doctor has identified.

Testosterone cyclopentionic acid is male sex hormone. It acts by substituting or supplementing the naturally occurring testosterone in the body.

Testosterone cypionate is a male sex hormone. It works by replacing or supplementing the testosterone that is naturally made in the body.

Applications Of Test Cyp

1. Testosterone cyclopentamphetamine is a synthetic androgen, mainly for clinical treatment of infertility or infertility;
2. testosterone cyclopentanepropanoic acid is used for cryptorchidism,
3. Testosterone cyclopentanone can be used for functional uterine bleeding, menorrhagia, endometriosis, uterine fibroids, menopausal syndrome, metastatic breast cancer and ovarian cancer;
4. Testosterone cyclopentachlorate for pituitary dwarfism;
5. Testosterone cyclopentanepropanoate for senile osteoporosis, aplastic anemia

Package and Shipping Of Test Cyp:

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

Shipping:

With 3-5 days after your payment

FAQ Of Test Cyp:

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
