

99% Purity Injectable Test Cypionate Anabolic Steroids Powder

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febr Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product: Test Cypionate
- Cas No.: 58-20-8
- Molecular Formula: $C_{27}H_{40}O_3$
- Molecular Weight: 412.60
- Apperance: White Powder
- Fineness: 99%
- Shelf Life: 2 Years
- Highlight: 99% Injectable Test Cypionate ,
Anabolic Injectable Test Cypionate ,
99% Injectable testosterone cypionate

Product Description

99% Purity Injectable Anabolic Steroids Powder Testosterone Cypionate Test Cypionate

Basic Information form Of Test Cypionate:

Product Name	Test Cypionate
Cas No.	58-20-8
Purity	99%
Appearance	white powder
MF	C ₂₇ H ₄₀ O ₃
MW	412.60
Shelf life	2 years

What Is Test Cypionate:

1. Testosterone Cypionate is the longest-estered testosterone available today. It has a half-life in the body of 15 to 16 days and is found as injectable oil. Because it reacts in the body for so long, it can cause more water retention than other steroids and is best used as bulking compound in a stack. As with all testosterone injectables, one can expect a considerable gain in muscle mass and strength during a cycle. Since testosterone readily converts to estrogen, the mass gained from this drug is likely to be accompanied by quite a bit of water retention. The resulting loss of definition of course makes cypionate a very poor choice for dieting or cutting phases. The excess level of estrogen brought about by this drug can also cause one to develop gynecomastia rather quickly. Should one notice an uncomfortable.

2. soreness, swelling or lump under the nipple, an ancillary drug like Nolvadex should be added immediately. This will minimize the effect of estrogen greatly, making the steroid much more tolerable to use. The powerful anti-aromatases Arimidex, Femara, or Aromasin are yet a better choice. Those who have a known sensitivity to estrogen may find it more beneficial to use ancillary drugs like Nolvadex and Proviron from the onset of the cycle, in order to prevent estrogen related side effects before they become apparent.

Applications Of Test Cypionate

Testosterone Cypionate Injections are primarily androgenic synthesized with anabolic (muscle building) characteristics. Testosterone promotes the well-being of the health and enhances Libido or sexual desire, energy, immunity power, reduces fat tissues, prevents loss of bone density (Osteoporosis), maintains lean muscle mass or improves cardiovascular activities. Testosterone is responsible for developing male sex organs and maintaining the biological process of secondary sex traits those distinguish between sexes. Don't confuse Testosterone being direct part of the reproductive system. The secondary sex organs which are enhanced by the influence of Testosterone are moustache, beard, chest, broad shoulders, spike-projected jaw or well-built muscle mass. Testosterone binds together the Androgen Receptors (AR) that helps muscle gain, fat loss, and muscle growth and repair. These mechanisms are activated by the Androgen Receptors (either directly or as dihydrotestosterone-DHT) and the hormonal cascade as well.

Package and Shipping Of Test Cypionate:

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

Shipping:

With 3-5 days after your payment

FAQ Of Test Cypionate:

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
