

Injectable Propionate Testosterone Powder Steroid Test Prop CAS 57-85-2

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febr Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product: Testosterone Propionate
- Molecular Formula: C₂₂H₃₂O₃
- Molecular Weight: 344.49
- Cas No.: 57-85-2
- Apperance: White Powder
- Fineness: 99%
- Shelf Life: 2 Years
- Highlight: **Injectable Propionate Testosterone Powder , Steroid Test Prop CAS 57-85-2, CAS 57-85-2 Propionate Testosterone Powder**

Product Description

Injectable Steroid Test Prop Testosterone Propionate Powder CAS 57-85-2

Basic Information form Of Testosterone Propionate:

Product Name	Testosterone Propionate
Cas No.	57-85-2
Purity	99%min
Appearance	white powder
Molecular Formula	C ₂₂ H ₃₂ O ₃
Molecular Weight	344.49
Shelf life	2 years

What Is Testosterone Propionate:

The testosterone suspension is an injectable testosterone hormone developed and used in water for decades and is actually the first synthetical androgenic steroid. In order to build the purpose of the public, testosterone suspensions have never been exceeded because it was the first development in the 1930s. Many underground laboratories also suspend this product in propylene glycol or oil (which makes very painful injections). It has no ester attached; therefore no weight of the ester is calculated.

100 USP injections provide testosterone propionate, a major endogenous androgenic testosterone derivative, for intramuscular administration. The esterification of 17-beta-hydroxy increases the duration of testosterone action. Testosterone propionate has been prepared in an oily solution and is slowly absorbed from the liquid phase when intramuscularly injected. This allows testosterone 100 to be administered at intervals of 3-4 days. 100 contains testosterone propionate in 10 ml of solution (100 mg of testosterone propionate / ml) for injection only.

100 is a transparent, pale yellow oily solution for intramuscular injection.

Propionate is testosterone for the treatment of primary gonadal dysfunction (congenital or acquired), testicular failure in men due to cryptorchidism, bilateral torsion, orchitis, testicular syndrome or testicular resection.

Applications Of Testosterone Propionate:

Testosterone propionate has been used to study its effects on pregnant ewes.

Testosterone propionate is the shortest ester attached to the testosterone hormone. This means that your body needs the least time to get rid of the ester and release the parent hormone into the body. Because of its short active life, testosterone propionate usually needs to be injected at least once every other day. Incredible, testosterone propionate leads to minimal side effects and minimal bloating; these side effects usually fade quickly when used to stop.

Androgen guides the development of male phenotypes during the embryogenesis and the male sterility secreted by testes. The hormone is converted to dihydrotestosterone in the target tissue, where it regulates several biological functions. Testosterone pyruvate has been obtained from plant synthesis. The product has an extended and faster effect when compared to the product.

Testosterone propionate is the shortest ester attached to testosterone. This means that your body needs the least time to get rid of the ester and release the parent hormone into the body. Due to its short active life, testosterone propionate usually needs to be injected at least every other day. Interestingly, testosterone propionate leads to minimal side effects and minimal bloating; these side effects usually fade rapidly when used to stop.

Benefits Of Testosterone Propionate:

The benefits of supplementation of testosterone-propionic acid as a testosterone based on anabolic steroids are nothing surprising and really cover the benefits of almost every interest in the metabolism of metabolic steroids. As testosterone, such benefits will include, but are not limited to,

Enhanced strength:
Increase muscle mass
Reduce body fat
Increase recovery
Increase sexuality

Greater happiness
Increase energy
Greater movement performance

As you can easily see the benefits of being truly great, a great deal of understanding of the testosterone is a brief overview. Testosterone greatly increases nitrogen retention, allowing more protein to be stored in the body's muscles, thereby increasing protein synthesis. In addition, due to its nature, testosterone greatly blocks and reduces the body's glucocorticoid; muscle slimming hormone not only destroys muscle tissue, but also promotes body fat growth. Equally important, as a strong anabolic and androgen testosterone to promote recovery and regeneration; the sooner we recover faster and the greater the growth; in addition, the greater our regeneration, the greater our exercise performance.

Package and Shipping Of Testosterone Propionate:

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

Shipping:

With 3-5 days after your payment

FAQ Of Testosterone Propionate:

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
