

99% Assay Testosterone Steroids Test Prop 100mg 57-85-2

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febr Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product: Testosterone Propionate
- Cas No.: 57-85-2
- Molecular Formula: C₂₂H₃₂O₃
- Molecular Weight: 344.49
- Purity: >99%
- Apperance: White Powder
- Shelf Life: 2 Years
- Highlight: 99% Assay Testosterone Steroids,
99% Test Prop 100mg, Test Prop 100mg 57-85-2

Product Description

99% Assay Testosterone Steroids Testosterone Propionate 100mg 57-85-2

Basic Information form Of Testosterone Propionate 100mg:

Product Name	Testosterone Propionate 100mg
Cas No.	57-85-2
Purity	99%
Appearance	white powder
Molecular Formula	C ₂₂ H ₃₂ O ₃
Molecular Weight	344.49
Shelf life	2 years

What Is Testosterone Propionate 100mg:

Testosterone propionate, an Testosterone Anabolic Steroid, is a popular anabolic androgenic steroid among athletes compared to other testosterone derivatives. This is because this steroid is comparatively much faster acting than other testosterone esters. This powerful mass drug is required to be administered frequently and can easily result in dramatic and rapid gains in terms of muscle size and strength.

Testosterone Propionate is a single ester testosterone compound and represents one of the most important testosterone compounds every manufactured. When synthetic testosterone was first created it was in its pure form. Simply put there was no ester attached, thereby providing a fast acting compound that would necessarily require a very frequent administration schedule. In 1937 the pharmaceutical giant Schering out of Germany would release the first ester base testosterone in Testosterone Propionate under the trade name Testoviron. The same trade name it would eventually give to its Testosterone Enanthate product. By attaching the Propionate ester to the hormone, this would allow for the hormone's release time to be controlled and provided a more efficient means in maintaining stable blood levels.

Although this was not the first synthetic testosterone preparation created, Testosterone Propionate would become the first commercially available testosterone product. It would also dominate the medical community until the 1960's and much of the newly born performance enhancing community.

Testosterone Propionate is an excellent anabolic steroid. As a testosterone compound it is highly versatile, tremendously beneficial and well-tolerated by most all adult men.

Applications Of Testosterone Propionate 100mg:

The Propionate ester is much faster acting (2-3 days) than Enanthate or Cypionate, and thus requires a more frequent injection schedule such as every day or every other day in order to keep blood levels as stable as possible. The benefit to this however, is that the steroid can be cleared from the body much more quickly after use is discontinued, thus making it a more preferable choice for tested athletes. Some bodybuilders also claim that Propionate tends to induce far fewer estrogen related side effects such as bloat than do the other esters of this powerful steroid.

Pharmacological effects similar to a testosterone, but slightly stronger than the latter. Because oral easily destroyed by the liver, the oral is invalid. Often intramuscular injection solution, the oil absorption is slow, strong and durable, can maintain time for just a few days.

Testosterone propionate can promote the development of male organs and secondary sex characteristic, promote protein synthesis and bone formation, estrogen, inhibit the growth of endometrium and ovary and pituitary function. Used for testosterone, cryptorchidism, male hypogonadism, gynecological diseases, such as menorrhagia, uterine fibroids, senile osteoporosis and aplastic anemia.

Introduction Of Testosterone Propionate 100mg:

Testosterone Propionate is a single ester testosterone compound, there was no ester attached, thereby providing a fast acting compound that

would necessarily require a very frequent administration schedule. Although synthetic in nature, Testosterone Propionate is an efficient hormone for the treatment of low testosterone.

As a pure testosterone, Testosterone Propionate carries an anabolic rating of 100 and an androgenic rating of 100 as well. Testosterone Propionate will yield a notable amount of anabolic and androgenic activity. This is important as not all steroids match their structural ratings in a translating capacity.

The five primary anabolic traits of Testosterone Propionate include:

Enhanced Protein Synthesis

Enhanced Nitrogen Retention

Increased Red Blood Cell Count

Inhibition of Glucocorticoid Hormones.

Package and Shipping Of Testosterone Propionate 100mg:

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

Shipping:

With 3-5 days after your payment

FAQ Of Testosterone Propionate 100mg:

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
