

57-85-2 Injectable Test Prop For Muscle Building Anabolic Steroids Powder

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febr Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product: Testosterone Propionate
- Apperance: White Powder
- Cas No.: 57-85-2
- Purity: 99%
- Molecular Formula: C₂₂H₃₂O₃
- Molecular Weight: 344.49
- Shelf Life: 2 Years
- Highlight: **57-85-2 Injectable Test Prop, Test Prop For Muscle Building, 57-85-2 test prop injection**

Product Description

57-85-2 Injectable Anabolic Steroids Powder Testosterone Propionate For Muscle Building

Basic Information form Of Testosterone Propionate:

Product Name	Testosterone Propionate
Cas No.	57-85-2
Molecular Formula	C ₂₂ H ₃₂ O ₃
Molecular Weight	344.49
Purity	99%
Appearance	white crystalline powder
Shelf life	2 years

What Is Testosterone Propionate:

Testosterone Propionate is a steroid hormone from the androgen and is found in mammals and other vertebrates, testosterone Propionate is primarily secreted in the tests of mails and the ovaries of female, although small amount are also secreted by the adrenal glands, testosterone Propionate is the principle male hormone and an anabolic steroid. Testosterone Propionate plays a key role in the development of male reproductive tissue such as the testis and prostates. In addition, testosterone Propionate is essential for health and well-being as well as the prevention of osteoporosis, testosterone Propionate is conserved through most vertebrates, although fish make a slightly difference from called 11-ketotestosterone.

Product Image Of Testosterone Propionate:

Function Of Testosterone Propionate:

Testosterone propionate can promote the development of male organs and secondary sexual characteristics, and promote protein synthesis and bone formation, be opposed to estrogen, suppress endometrial growth and the function of ovarian and pituitary. It is used for non-testis syndrome, cryptorchidism, male hypogonadism, gynecological diseases such as hypermenorrhea, uterine fibroids, senile osteoporosis and aplastic anemia.

Usage:

Testosterone Propionate is the shortest commonly ester attached to the Testosterone hormone. This means it takes your body the least amount of time to rid itself of the ester and release the parent hormone into the body. Due to its short active life, testosterone propionate typically needs to be injected every other day at a minimum.

Applications:

Testosterone propionate has been used for studying its effects on pregnant ewes.

Testosterone Propionate is the shortest commonly ester attached to the Testosterone hormone. This means it takes your body the least amount of time to rid itself of the ester and release the parent hormone into the body. Due to its short active life, testosterone propionate typically needs to be injected every other day at a minimum. Anecdotally, testosterone propionate causes the least side effects and the least bloating; these side effects usually subside very quickly when use is ceased.

Order step:

- 1: After our quotation, you will choose to accept or not.
- 2: If you decide to have a try, choose a payment method to pay for the order.
- 3: We will send the package out in 24 hours after we received the payment, then will send the tracking number with packaging detail to you via mail.
