

Safest Injectable Anabolic Steroids Testosterone Propionate 100mg/MI Cas 57-85-2

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febr Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product: Testosterone Propionate
- Cas No.: 57-85-2
- Molecular Formula: C₂₂H₃₂O₃
- Molecular Weight: 344.49
- Fineness: 99%
- Aspect: White Powder
- Shelf Life: 2 Years
- Highlight: **Anabolic Steroids Testosterone Propionate 100mg/MI**
, **Anabolic Steroids Testosterone Propionate 100mg/MI**
, **57-85-2 Testosterone Propionate 100mg/MI**

Product Description

Safest Injectable Anabolic Steroids Testosterone Propionate 100mg/MI Cas 57-85-2

Basic Information form Of Testosterone Propionate:

Product Name	Testosterone Propionate
Synonyms	Test PRO; Testosterone propionate; Agovirin;Test prop
Cas No.	57-85-2
Molecular Formula	C ₂₂ H ₃₂ O ₃
Molecular Weight	344.49
Fineness	99%
Aspect	white powder
Shelf life	2 years

What Is Testosterone Propionate:

Testosterone propionate is an excellent synthetic metabolic steroid. As a testosterone compound, it is highly versatile, highly beneficial and well tolerated for most of all adult males. When we consider the price of testosterone propionate, it will only enhance its attractiveness.

Although very beneficial, the use of testosterone propionate in terms of specific benefits has no advantage over other testosterone forms. The testosterone compound has no more side effects than any testosterone form or less. However, some people will find that when the injection frequency is based on every other day, it is slightly easier to maintain a stable and peak blood level in this form. This may be some of the advantages, but you can really get the same results as testosterone propionate as all testosterone forms.

Testosterone propionate is an injectable form of the usual male androgen testosterone. The addition of propionate will slow down the rate of testosterone release from the injection site, but only a few days. Thus, testosterone propionate has a faster effect than other testosterone esters (e.g., cyclopentanepropanoate or heptanoate) and requires a more frequent dosing regimen. Most of the records of testosterone propionate are injectable testosterone older and coarsely in the form of chronic effects and more comfortable esters after it developed obsolete. However, those infrequent frequent injection schedules found that testosterone propionate was acceptable at all. As injectable testosterone, it is a powerful large-scale construction of drugs that can produce rapid growth in muscle size and strength. Testosterone propionate is a modified form of testosterone in which the carboxylic acid ester (propionic acid) has been attached to the 17-beta hydroxyl group. The half-life of testosterone propionate is about two days after injection.

**Testosterone propionate usage:**

1. Testosterone Propionate is used for the treatment of breast cancer, ovarian cancer, uterine fibroids, such as multiple myeloma and renal cell carcinoma.
2. Testosterone Propionate was the first form to hit the shelves in mass quantities made ready for human use. Like the popular oral steroid Dianabol, Testosterone-Propionate has been available for a very long time.
3. Further, most who use Testosterone-Propionate find it very easy to control because the Propionate version is so fast acting and short lived due to its very nature.

We know that use testosterone propionate will bring some side effects ,now let me know some knowledges

Testosterone is easily aromatized into estradiol (estrogen) in the body. The aromatase (estrogen synthase) enzyme is responsible for the metabolism of testosterone. Elevated estrogen levels can cause side effects, such as increased water retention, increased body fat and male breast development. High levels of testosterone may produce androgenic side effects, including oily skin, acne and body / facial hair growth. Men with a hair loss genetic tendency (androgenic hair loss) may notice accelerated male baldness.

Testosterone propionate is usually considered to be a painful injection. This is due to the very short carbon chain of propionate, which can stimulate tissue at the site of injection.

Many sensitive individuals choose to completely leave this steroid, their body with significant soreness and low fever reactions that may last several days after each injection.

Package and Shipping Of Testosterone Propionate:

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

Shipping:

With 3-5 days after your payment

FAQ Of Testosterone Propionate:

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
