

High Purity Injectable Testosterone Steroids Testosterone Propionate / Test Prop

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febr Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product: Testosterone Propionate
- MF: C22H32O3
- MW: 344.49
- Cas No.: 57-85-2
- Appearance: White Powder
- Purity: 99.0%
- Shelf Life: 2 Years
- Highlight: **High Purity Injectable Testosterone Steroids, High Purity Injectable Testosterone Propionate, High Purity Injectable Test Prop**

Product Description

High purity Injectable Testosterone Steroids Testosterone Propionate / Test Prop

Basic Information form Of Testosterone Propionate:

Product Name	Testosterone Propionate
Synonyms	Test PRO; Testosterone propionate; Agovirin; Test prop
Cas No.	57-85-2
Molecular Formula	C ₂₂ H ₃₂ O ₃
Molecular Weight	344.49
Purity	99.0%
Appearance	white powder
Shelf life	2 years

Description Of Testosterone Propionate:

The testosterone suspension is an injectable testosterone hormone developed and used in water for decades and is actually the first synthetical androgenic steroid. In order to build the purpose of the public, testosterone suspensions have never been exceeded because it was the first development in the 1930s. Many underground laboratories also suspend this product in propylene glycol or oil (which makes very painful injections). It has no ester attached; therefore no weight of the ester is calculated.

100 USP injections provide testosterone propionate, a major endogenous androgenic testosterone derivative, for intramuscular administration. The esterification of 17-beta-hydroxy increases the duration of testosterone action. Testosterone propionate has been prepared in an oily solution and is slowly absorbed from the liquid phase when intramuscularly injected. This allows testosterone 100 to be administered at intervals of 3-4 days. 100 contains testosterone propionate in 10 ml of solution (100 mg of testosterone propionate / ml) for injection only.

100 is a transparent, pale yellow oily solution for intramuscular injection.

Propionate is testosterone for the treatment of primary gonadal dysfunction (congenital or acquired), testicular failure in men due to cryptorchidism, bilateral torsion, orchitis, testicular syndrome or testicular resection.

Dosage Of Testosterone propionate:

The most common dosage schedule for this compound (men) is to inject 50 to 100mg, every day or 2nd day. As with the more popular esters, the total weekly dosage would be in the range of 300-700mg. As with all testosterone compounds, this drug is most appropriately suited for bulking phases of training. Here it is most often combined with other strong agents such as Dianabol, Anadrol, or Deca-Durabolin, combinations that prove to work quite well. Propionate however is sometimes also used with nonaromatizing anabolics/androgens during cutting or dieting phases of training, a time when it's fast action and androgenic nature are also appreciated. Popular stacks include a moderate dosage of propionate with an oral anabolic like Winstrol (15-35 mg daily), Primobolan (50-150mg daily) or oxandrolone (15-30mg daily). Provided the body fat percentage is sufficiently low, the look of dense muscularity can be notably improved (barring any excess estrogen buildup from the testosterone). One could also add a non-aromatizing androgen like trenbolone or Halotestin, which should have an even more extreme effect on subcutaneous body fat and muscle hardness. Of course with the added androgen content any related side effects will become much

Package and Shipping Of Testosterone Propionate:

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

Shipping:

With 3-5 days after your payment

**FAQ Of Testosterone Propionate:**

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
