

White Crystalline Testosterone Powder 99.5% For Increasing Weight

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febr Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product: Testosterone Isocaproate
- Cas No.: 15262-86-9
- Fineness: 99.4%
- Molecular Weight: 386.57
- Chemical Formula: C₂₅H₃₈O₃
- Appearance: White Crystalline Powder
- Shelf Life: 2 Years
- Highlight: **White Crystalline Testosterone Powder ,
Testosterone Powder 99.5%,
Testosterone Powder For Increasing Weight**

Product Description

Testosterone Isocaproate White Crystalline Powder 99.5% For Increasing Weight

Basic Information form Of Testosterone Isocaproate :

Product Name	Testosterone Isocaproate
Cas No.	15262-86-9
Chemical Formula	C ₂₅ H ₃₈ O ₃
MW	386.57
Purity	99.4%
Facade	white powder
Shelf life	2 years

Description Of Testosterone Isocaproate:

Testosterone Isocaproate is a hormone produced predominantly in the testes of males. It is the hormone responsible in giving males their specific sexual traits. Transdermal testosterone mimics the body's natural rhythmic release of testosterone through a time-release patch.. Testosterone Isocaproate is used to improve testosterone deficiencies such as hypogonadism and sexual dysfunction with limited side effects. Testosterone Isocaproate got its introduction to the steroid world by appearing in both Omnadren as well as Sustanon 250, the two most popular testosterone blends currently on the market. Along with Anadur, Deca-Durabolin, and Durabolin, this is an-other steroid containing the substance nandrolone.

Testosterone Isocaproate will help in increasing the body weight and will also help in gaining the strength. It also helps in losing fat in the body and gives an increase in libido, red blood cells, stamina and quick recovery after heavy training. As told earlier it is very hard to be found in the market in its purest form but its raw powder form is available in the market in the form of Testosterone Cypionate and Testosterone Enanthate. Testosterone Isocaproate is useful in increasing the synthesis of protein in the body, reduction of the cortisol, increasing the ability to recover especially after heavy trainings, increasing strength and helps the person gaining more mass. It is also very efficient in both cutting and the bulking cycles. But as it is related with the family of androgen it will have aromatizing properties as well. Apart from these benefits it has got all other benefits associated with it which are also associated with any other testosterone.

Product Image Of Testosterone Isocaproate:

Application Of Testosterone Isocaproate:

This medication is given by injection into the buttock muscle as directed by your doctor, usually every 1 to 4 weeks. Do not inject this medication into a vein. Dosage is based on your medical condition, testosterone blood levels, and response to treatment. Use it regularly in order to get the most benefit from it. To help you remember, use a calendar to mark the days you will receive an injection.

Dosage Of Testosterone Isocaproate:

Testosterone Isocaproate can be taken in the form of injection. For beginners the dosage is recommended to be 250 mg/week which can be taken once or twice in the week. For professional body builders the dosage can be increased to 1000 mg per week as well.

The Benifits of Testosterone Isocaproate

Testosterone Isocaproate will help in increasing the body weight and will also help in gaining the strength.
