Description Of Testosterone Isocaproate:

Testosterone Isocaproate is very rarely found as a single ester based testosterone compound and in most all cases part of testosterone mixtures. Regardless of the attached ester, all testosterones will produce similar effects. Testosterone Isocaproate will increase protein synthesis, reduce cortisol, increase recovery abilities, aid in increasing strength and mass & also for Hormone replacement therapy.

Testosterone is both a highly anabolic and androgenic hormone. Mode of action of Testosterone is same regardless ester attached to it. (Refer testosterone mechanism of action for details).

Application Of Testosterone Isocaproate:

Testosterone Isocaproate got its introduction to the steroid world by appearing in both Omnadren as well as Sustanon 250, the two most popular testosterone blends currently on the market.

Along with Anadur, Deca-Durabolin, and Durabolin, this is another steroid containing the substance nandrolone. Testosterone Isocaproate is a favorite among athletes since it brings good results with few side effects. Although it is often compared to "Deca", its effect is mg per mg comparable or slightly less. The reason is that Testosterone Isocaproate is slightly androgenic with an anabolic effect, thus it strongly promotes the protein synthesis. Testosterone Isocaproate does not strongly aromatize in dosages below 4 ml/week. Testosterone Isocaproate is effective for 1-2 weeks, thus requiring more frequent injections than Deca.

Testosterone Isocaproate will help in increasing the body weight and will also help in gaining the strength. It also helps in losing fat in the body and gives an increase in libido, red blood cells, stamina and quick recovery after heavy training. Testosterone Isocaproate can be taken in the form of injection. For beginners the dosage is recommended to be 250 mg/week which can be taken once or twice in the week. For professional body builders the dosage can be increased to 1000 mg per week as well.

Effects Of Testosterone Isocaproate:

- 1) Test Isocaproate is a good compound for Sustanon 250 and test blends.
- 2) Test Isocaproate also good at weight gain and fat loss.
- 3) Test Isocaproate help a lot of endurance, meaning that they will not get tired easily and avoid wasting muscle.
- 4) Test Isocaproate can get lean muscles and gain a lot of strength
- 5) Test Isocaproate can improve testosterone deficiencies such as hypogonadism and sexual dysfunction with limited side effects.
