

Male Sex Steroid Hormones Testosterone Powder For Muscle Growth

Our Product Introduction

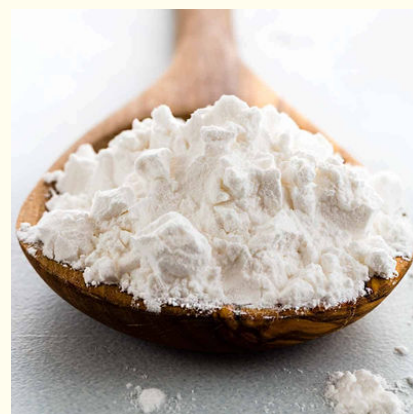

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febr Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product Name: Testosterone Isocaproate
- Molecular Formula: $C_{25}H_{38}O_3$
- Cas No: 15262-86-9
- Molecular Weight: 386.57
- Fineness: 99.3%
- Appearance: White Powder
- Shelf Life: 2 Years
- Highlight: **Sex Steroid Hormones Testosterone Powder, Male Sex Hormones Testosterone Powder, Muscle Growth testosterone powder supplements**

Product Description

Natural Male Sex Steroid Hormones Testosterone Isocaproate For Muscle Growth

Basic Information form Of Testosterone Isocaproate :

Product Name	Testosterone Isocaproate
Cas No.	15262-86-9
MF	C25H38O3
Aspect	white Crystalline powder
MW	386.57
Purity	99.3%
Shelf life	2 years

What is Testosterone Isocaproate ?

As Isocaproate is merely an ester, not an anabolic steroid, we merely need to understand the hormone it is attached to, and in this case, that hormone is testosterone. Testosterone is a potent anabolic and androgenic steroid that is produced by all human beings and essentially so. Through supplementation, we are merely providing a synthetic form through exogenous administration; the body does not know the difference in this exogenous form or what it naturally produces; it is the same hormone. Playing roles on our physical, sexual and even mental health, the testosterone hormone is beyond important, and is the only thing that will truly remedy a low level condition should it exist. Of course, by providing even more testosterone than what can naturally be produced, by taking our total levels to a higher end we enhance the traits; we enhance performance as there is more testosterone available to the body. Through such supplementation, protein synthesis is enhanced, the rate in-which cells build proteins, as is nitrogen retention; nitrogen representing 16% of the total composition of all muscle tissue. Further, such supplementation increases red blood cell count, thereby increasing blood oxygenation, and even reduces glucocorticoid hormone production. For those who do not know what glucocorticoids are, these are stress hormones that destroy muscle tissue and promote fat gain.

While bodybuilders and athletes may not necessarily care about its molecular structure, they do care about whether it works or not. Most experienced bodybuilders and athletes are aware of what testosterone does in the body. For those new to anabolic androgenic steroid use, it's important to remember that testosterone has more functions in the body than to merely improve strength, muscle mass, and sex drive.

Testosterone is involved in numerous body functions and activities and has an influence on:

growth and strength of bones

facial and body hair growth

a deeper voice

metabolism

digestion

psychological well-being

While those are some tremendous traits, testosterone also increases Insulin-Like Growth Factor-1 (IGF-1) production; IGF-1 being a potent naturally produced peptide hormone of tremendous anabolic power; not to mention carrying tremendous rejuvenating properties. Through this and all the above mentioned traits, the total anabolic atmosphere is enhanced, your metabolism is revved and it all leads to a more effective and efficient you. Of course, you may be asking what all this means in-regards to benefits, and you may be asking what all of this means in a therapeutic sense? As it pertains to therapeutic treatment, all of the traits discussed above are found lacking and supplementation brings them back to a proper level. Further, as testosterone regulates our libido, sexual performance and even plays a role on our energy levels, clarity of thought and general disposition all such areas are improved. Of course, these Isocaproate testosterone based compounds are rarely prescribed for therapeutic purposes, generally single ester testosterone compounds are used to reach such an end; as is the case, performance is really the only concern here, and with that in mind let's take a look.

What is the benefits of Testosterone Isocaproate ?

The benefits of Isocaproate based compounds like Omnadren and Sustanon-250 can be broken down into two generalized categories; the benefits obtained by the traits above and what this type of compound provides in comparison to a single ester form. As discussed early on, the benefit of a testosterone mixture is to provide the best of both worlds in a small and large ester sense, and this provides both a fast acting testosterone with long lasting effects in an overall duration sense. That may sound overly simplified, but there's really nothing more to it than that. Then we have the actual benefits based on the traits above, and as Omnadren and Sustanon-250 are almost strictly used for performance we're only going to focus on the benefits in that light.

For the off-season athlete, the individual looking to add significant amounts of lean mass and strength, Isocaproate forms are a perfect choice as they will significantly promote both ends. Further, by the increased metabolic atmosphere, you are now able to gain more lean mass with less body-fat accumulation, and that is invaluable. Of course, the same compounds can be used for cutting too; after all, an enhanced metabolism means increased fat-burning abilities, and as testosterone is a tremendous lean tissue preserver it's simply an excellent choice for any cutting plan.

If that's not enough, regardless of your purpose of use these Isocaproate based testosterone compounds will enhance your muscular endurance; they will increase your overall rate of recovery and even provide you with more energy. You will not tire out as fast, you will heal and your body will repair at a faster and more efficient rate, and if that's not performance enhancement nothing is. In many ways, the testosterone steroid is one of the easiest to understand, one of the simplest of all, but while it may be simple it is beyond valuable and perhaps the most valuable anabolic androgenic steroid of all time. Further, when it comes to the healthy adult male, it is also one of the most well-tolerated, and there is nothing more valuable than that.

Package and Shipping Of Testosterone Isocaproate

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

Shipping:

With 3-5 days after your payment

FAQ Of Testosterone Isocaproate:

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
