

Bodybuilding Steroids Test Powder Testosterone Isocaproate For Men CAS 15262-86-9

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febre Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product Name: Testosterone Isocaproate
- Cas No: 15262-86-9
- Synonyms: Test Iso
- Purity: 99%Min
- Appearance: White Crystalline Powder
- Molecular Formula: C₂₅H₃₈O₃
- Molecular Weight: 386.57
- Shelf Life: 2 Years At -20°C Powder
- Highlight: **Bodybuilding Steroids Test Powder, Testosterone Isocaproate For Men, Testosterone Isocaproate 15262-86-9**

Product Description

Bodybuilding Steroids Test Powder Testosterone Isocaproate for Men CAS 15262-86-9

Basic Information form Of Testosterone Isocaproate :

Product Name	Testosterone Isocaproate
Synonyms	Test Iso
Cas No.	15262-86-9
Molecular Formula	C ₂₅ H ₃₈ O ₃
Appearance	white Crystalline powder
Purity	99.0%MIN
Molecular Weight	386.57
Shelf life	2 years at -20°C Powder

Description Of Testosterone Isocaproate

Isocaproate, it is not an anabolic steroid but an ester that can be attached to a steroid in the same fashion as the more popular Cypionate or Enanthate esters. Like the Cypionate and Enanthate, Isocaproate can also be attached to the testosterone hormone, but in the case of Isocaproate this will typically be the only place we see it attached. Testosterone-Isocaproate, a single ester form is virtually unheard of; if you find it then it was more than likely a specialty order, and there's really no reason to ever need Testosterone-Isocaproate in this single ester form. Where we'll find the Isocaproate ester most commonly and where it serves a large benefit is in testosterone mixtures; specifically Omnadren and Sustanon-250. Omnadren and Sustanon-250 are both testosterone compounds with four esters attached; four varying in size distinct esters that make up one total testosterone compound. For all intense purposes, these two compounds are virtually identical; their total makeup is almost the same with a single ester difference, and as such the same benefits can be obtained. The composition of each is as follows:

• Omnadren

- Testosterone-Propionate 30mg
- Testosterone-Phenylpropionate 60mg
- Testosterone-Isocaproate 60mg
- Testosterone-Caproate 100mg

• Sustanon-250

- Testosterone-Propionate 30mg
- Testosterone-Phenylpropionate 60mg
- Testosterone-Isocaproate 60mg
- Testosterone-Decanoate 100mg

With both compounds you have a 250mg/ml dosing of testosterone and by the mixture of small to large esters you receive the benefits associated with all forms. For example, you receive the benefits of a fast acting testosterone compound due to the Propionate and Phenylpropionate esters, and you receive the benefits of a long lasting testosterone due to the Caproate or Decanoate ester. As for the Isocaproate ester, this is a moderate sized ester that fills the role in an in-between sense between the small and large esters. At any rate, the Isocaproate ester plays an important role as it helps keep blood levels stable, and through the total compound you are receiving a total testosterone benefit for a long period of time. With all of this in mind, we want to take a look at the basic nature, the benefits of supplementation, and of course, the side-effects of use and in doing so enable you to reach the successful supplementation you desire.

How to Storage?

- It is recommended to store metribolone at the room temperature below 30 degrees C.
- Keep the drug away from direct sunlight, heat and moisture.
- Do not let the drug at the sight and reach of children.

Applications Of Testosterone Isocaproate:

Testosterone Isocaproate will help in increasing the body weight and will also help in gaining the strength. It also helps in losing fat in the body and gives an increase in libido, red blood cells, stamina and quick recovery after heavy training. As told earlier it is very hard to be found in the market in its purest form but its raw powder form is available in the market in the form of Testosterone Cypionate and Testosterone Enanthate.

Testosterone Isocaproate is useful for male body such as: increasing the synthesis of protein in the body, reduction of the cortisol, increasing the ability to recover after heavy trainings, increasing strength and helps the person gaining more mass. It is also very efficient in both cutting and the bulking cycles. But as it is related with the family of androgen it will have aromatizing properties as well.

Testosterone Isocaproate can be taken in the form of injection. inject once or at max twice a week is enough due to its long active life (9 days) which means it will stay in the body for a longer period of time.

Testosterone Isocaproate is a hormone produced predominantly in the testes of males. It is the hormone responsible in giving males their specific sexual traits.

Package and Shipping Of Testosterone Isocaproate

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

Shipping:

With 3-5 days after your payment

FAQ Of Testosterone Isocaproate:

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
