

Trestolone Decanoate 99.2% Muscle Building Hormone Steroids Powder CAS 5721-91-5

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febr Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Name: Testosterone Decanoate
- Chemical Formula: C₂₉H₄₆O₃
- Molecular Weight: 442.68
- Synonyms: Testosterone Decanoate;4-Androsten-17beta-ol-3-one Decanoate
- Cas No: 5721-91-5
- Assay: 99.2%
- Appearance: White Powder
- Shelf Life: 2 Years
- Highlight: **Trestolone Decanoate Hormone Steroids Powder**
, Muscle Building Trestolone Decanoate,
CAS 5721-91-5 Testosterone Powder

Product Description

Trestolone Decanoate 99.2% Muscle Building Hormone Steroids Powder CAS 5721-91-5

Basic Information form Of Testosterone Decanoate:

Product Name	Testosterone Decanoate
Synonyms	testosterone decanoate;4-Androsten-17beta-ol-3-one Decanoate
Cas No.	5721-91-5
Chemical Formula	C29H46O3
Molecular Weight	442.68
Appearance	white crystalline powder
Assay	99.2%
Shelf life	2 years

Description Of Testosterone Decanoate:

Deca is not known as a very "fast" builder. The muscle building effect of this drug is quite noticeable, but not dramatic. The slow onset and mild properties of this steroid therefore make it more suited for cycles with a longer duration. In general one can expect to gain muscle weight at about half the rate of that with an equal amount of testosterone. A cycle lasting eight to twelve weeks seems to make the most sense, expecting to elicit a slow, even gain of quality mass. Although active in the body for much longer, Deca is usually injected once or twice per week.

The dosage for men is usually in the range of 300-600mg/week. If looking to be specific, it is believed that Deca will exhibit its optimal effect (best gain/side effect ratio) at around 2mg per pound of lean bodyweight/weekly. Deca is also a popular steroid among female bodybuilders. They take a much lower dosage on average than men of course, usually around 50mg weekly. Although only slightly androgenic, women are occasionally confronted with virilization symptoms when taking this compound. Should this become a concern, the shorter acting nandrolone Durabolin would be a safer option. This drug stays active for only a few days, greatly reducing the impact of androgenic buildup if withdrawal were indicated.

Application Of Testosterone Decanoate

A stronger androgen such as Anadrol or testosterone could also be substituted, producing greater results. When mixed with Deca, the androgen dosage can be kept lower than if used alone, hopefully making the cycle more comfortable. Additionally one may choose to continue Deca for a number of few weeks after the androgen has been stopped. This will hopefully harden up some of the bloat produced by the androgen, giving a more quality appearance. Remember that endogenous testosterone production will not resume during Deca therapy, and ancillaries are likewise still needed.

Package and Shipping Of Testosterone Decanoate:

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

Shipping:

With 3-5 days after your payment

FAQ Of Testosterone Decanoate:

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
