

Muscle Building Testosterone Anabolic Steroid Undecanoate Andriol CAS 5949-44-0

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febr Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Name: Testosterone Undecanoate
- Cas No: 5949-44-0
- Chemical Formula: C₃₀H₄₈O₃
- Molecular Weight: 456.68
- Assay: 99.0%
- Appearance: White Powder
- Shelf Life: 2 Years
- Highlight: **Testosterone Anabolic Steroid Undecanoate Andriol**
Muscle Building Testosterone Anabolic Steroid, Testosterone Powder CAS 5949-44-0

Product Description

Muscle Building Testosterone Anabolic Steroid Undecanoate Andriol CAS 5949-44-0

Basic Information form Of Testosterone Undecanoate:

Product Name	Testosterone Undecanoate
Cas No.	5949-44-0
Chemical Formula	C ₃₀ H ₄₈ O ₃
Molecular Weight	456.68
Appearance	white crystalline powder
Assay	99.0%
Shelf life	2 years

Description Of Testosterone Undecanoate:

Andriol first became available in the early 1980s. This compound contains 40 mg of testosterone undecanoate, based in oil (oleic acid) and sealed inside a capsule.

Stracting the ester weight, this equates to a dosage of approximately 25mg of raw testosterone per cap. The design of this steroid is quite different from that of most oral steroids.

Drugs administered orally generally enter the blood stream through the liver. When a steroid compound is given this way without some form of structural protection, it will be quickly broken down during the "first pass".

This process leaves very little steroid intact, basically deactivating the drug. Adding a methyl group (c-17 AA) to the structure is one way to protect it from this process, however stress is also placed on the liver as a result.

In some instances this stress can lead to actual damage to liver tissues, so the designers of this steroid sought another way to protect the testosterone molecule. With Andriol, this was accomplished by making a form of testosterone that would be absorbed through the lymphatic system. This is due to its high fat solubility brought about by the ester, and its suspension in oil.

Having the compound absorbed this way was thought to be very advantageous, as it allows the steroid to bypass the destructive first-pass through liver. This should permit the compound to enter the blood stream intact, without the need for a harsh chemical alteration. The ester breaks off once it is in circulation of course, yielding free active Pharmacokinetics of Oral Testosterone. In design this steroid appears to be undecanoate that of a completely liver safe and orally active form of testosterone.

Testosterone Undecanoate powder

Testosterone undecanoate or testosterone undecylate is an ester of testosterone. This hormone is used in androgen replacement therapy primarily for the treatment of male hypogonadism, and is currently under research for use as a male contraceptive. It is sold and distributed under the brand names Andriol, Undestor, Nebido, Pantestone, Restandol, Cernos Depot, Nebido-R and Reandron 1000.

This is very special drug with it's unique advantages and disadvantages. Professional bodybuilders usually use it only in the pause between cycles but amateur bodybuilders, females and athletes too concerned with safe usage can use it in separate cycles. Testosterone undecanoate is being converted in the body into dihydrotestosterone, which almost does not aromatize, therefore estrogen-related side effects are not an issue.

Andriol is taken orally, therefore, on the first glance, it cannot bypass the liver where all oral testosterone are being destroyed. However, pharmacologists invented following solution: testosterone undecanoate (Andriol) is being made in capsules, which contain very specific fatty acid, which makes andriol bypassing the liver and reach it's target through lymphatic system. Unfortunately, it did not work out as planned

completely. Part of substance is being absorbed through lymphatic system and converted to test as planned. Another part is moved out of the body faster than it become effective. The good thing is that the liver is not affected.

Average dosage is 6 capsules a day (and this is 240 mg/ ED); however, only 6.83% of substance actually reach bloodstream, the rest is wasted. Furthermore, it is being moved out of the body very quickly through the kidneys. Try to imagine what happened if you inject let's say regular testosterone suspension at a dosage 240 mg/ED (1700 mg/week)! But with andriol dosages below 240 mg/ED have very low effect, even 6 caps/day produces relatively moderate effect.

Thus andriol is useless for "serious" bodybuilders on heavy cycles and mostly used to improve libido during PCT (post cycle therapy) to maintain test level.

However, it has it's own unique niches! Because of low testosterone release it is extremely safe and could be used by cautious athletes and females. Furthermore, it is not detectable just in one week after cycle is over thus making it a good drug when contest is coming close. Extra advantage of Andriol is that it does not affect natural testosterone production unless taken too long and in high dosages.

Package and Shipping Of Testosterone Undecanoate:

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

Shipping:

With 3-5 days after your payment

FAQ Of Testosterone Undecanoate:

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
