

Male Enhancement Steroids Boldenone Undecanoate Help Muscle Growth 13103-34-9

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febr Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Name: Testosterone Undecanoate
- Cas No: 13103-34-9
- Chemical Formula: $C_{30}H_{48}O_3$
- Molecular Weight: 456.68
- Assay: 99.0%
- Appearance: White Powder
- Shelf Life: 2 Years
- Highlight: **Male Enhancement Steroids Boldenone Undecanoate**
, Muscle Growth Boldenone Undecanoate,
13103-34-9 Male Enhancement Steroids

Product Description

Male Enhancement Steroids Boldenone Undecanoate Help Muscle Growth 13103-34-9

Basic Information form Of Boldenone Undecylenate:

Product Name	Boldenone Undecylenate
Cas No.	13103-34-9
Chemical Formula	C30H48O3
Molecular Weight	452.67
Appearance	white crystalline powder
Assay	99.0%
Shelf life	2 years

Description Of Boldenone Undecylenate:

Boldenone Undecylenate is an anabolic steroid for veterinary development, primarily for the treatment of horses. In the United States, it does not apply to humans and can only be used by veterinary clinics. Cholesterol activity is mainly synthetic metabolites, with low androgenic potency. Will increase nitrogen retention, protein synthesis, increase appetite and stimulate the release of erythropoietin in the kidney.

Boldenone Undecylenate has become a very popular steroid with athletes and bodybuilders because it has very low side effects and has an improved metabolic nature that promotes stable growth of muscle mass

This steroid is the favorite among bodybuilders who want to get a solid income in the absence of extra expansion or are approaching the game.

This steroid also significantly increases protein synthesis and erythrocyte counts, which means that nutrients can be delivered more efficiently throughout the body. As a result, Equipoise can make more use of less food, enhance its ability as an effective steroid, use it in "cutting", and bodybuilders are trying to reduce calories to enter the gameshape.

Application Of Boldenone Undecylenat

For bodybuilders, should be used with some use Equipoise / boldenone undecenoic acid can cause sexual dysfunction.

In order to maintain a stable blood level, at least once a week Equipoise. It is most commonly used for men's weekly dose of 400-600mg, women use 50-150mg per week.

Equipment / Cholesterol Octadecenoate is not a fast mass producer, but will provide a steady and stable gain for strength and quality of muscle mass. When this drug is used for longer periods, it usually lasts for at least 10 weeks in length and can be seen as the most positive effect of this drug.

Equipment (octadecenoic acid cholesterol) is historically a mammalian steroid, but has also been used as a UGL human preparation for some time.

In medical use, the balance can promote erythropoietin (EPO) stimulating factor, thereby stimulating bone marrow growth, resulting in increased erythropoiesis. More red blood cells mean more hemoglobin, higher oxygen carrying capacity. Due to its potent corticosteroid properties, EQ may also lead to changes in electrolyte levels.

Equipoise (Boldenone Undecylenate) 250mg/ml - 10ml
 5.88ml Oil
 2.5g Boldenone Undecylenate Liquid
 0.2ml BA (2%)
 1.8ml BB (18%)

Boldenone Undecylenate Stacking

The equipment is very effective, not only for the public, but also for game preparation (cutting), because it is very poor aroma. When Boldenone and similar Proviron, Parabolan (trenbolone hex), Halotestin or Winstrol and other steroids combination, the muscle hardness and density can be greatly improved. For cutting, it is also combined with phenylpropionate propionate, the possible cycle is 300-500mg of galenone plus 300-500mg of nandrolone-ph for 6-8 weeks. It can be used in the final (mitigated) part of the longer cycle of 100-200 mg / week for approximately 6 weeks of continuous use of 50 mg / day of Vestor.

Boldenone Undecylenate Dosage and usage

Stay active for a long time, every 3 or 4 weeks need to inject drugs. However, the athlete must be held once every few days to maintain a stable level. If not, do not be less than once a week. The average weekly dose is 400-600 mg (very few cases, 200 mg). It is sufficient to add no more than 600 milligrams of dose because it does not produce any additional benefit.

The common expansion cycle length is 10-12 weeks, the cycle is shorter, because this is slow acting drugs

Package and Shipping Of Boldenone Undecylenate:

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

Shipping:

With 3-5 days after your payment

FAQ Of Boldenone Undecylenate:

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
