

Energy Improvement Testosterone Steroids Powder Testosterone Acetate

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febr Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Name: Testosterone Acetate
- Cas No: 1045-69-8
- Appearance: White Crystalline Powder
- Molecular Formula: $C_{21}H_{30}O_3$
- Molecular Weight: 330.47
- Purity: 99.2%MIN
- Shelf Life: 2 Years
- Highlight: **Energy Improvement Testosterone Steroids Powder**
, Testosterone Acetate Raw Steroid Powders

Product Description

Energy Improvement Testosterone Steroids Powder Testosterone Acetate

Basic Information form Of Testosterone Acetate:

Product Name	Testosterone Acetate
Cas No.	1045-69-8
Molecular Formula	C ₂₁ H ₃₀ O ₃
Molecular Weight	330.47
Appearance	white crystalline powder
Assay	99.2%MIN
Shelf life	2 years

Description Of Testosterone Acetate:

Testosterone Acetate is an androgenic steroid with a pronounced anabolic effect. Most acetate treatments deliver medication to the body relatively quickly. Testosterone Acetate has very low risk of water retention. Individuals that utilize this form of Testosterone also claim that it is arguably the most painless form of Testosterone.

Testosterone Acetate ester is much faster acting, and thus requires a more frequent schedule in order to keep blood levels as stable as possible. The benefit to this however, is that the steroid can be cleared from the body much more quickly after use is discontinued, thus making it a more preferable choice for tested athletes. Athletes use Testosterone Acetate to see dramatic gain in muscle size and strength, as well as an overall sense of well being and increases libido and sex drive.

Usage Of Testosterone acetate

Testosterone acetate powder is an androgenic steroid with a pronounced anabolic effect. Most acetate treatments deliver medication to the body relatively quickly. Testosterone acetate powder has very low risk of water retention. Individuals that utilize this form of Testosterone also claim that it is arguably the most painless form of Testosterone.

Testosterone acetate powder ester is much faster acting, and thus requires a more frequent schedule in order to keep blood levels as stable as possible. The benefit to this however, is that the steroid can be cleared from the body much more quickly after use is discontinued, thus making it a more preferable choice for tested athletes. Athletes use Testosterone acetate powder to see dramatic gain in muscle size and strength, as well as an overall sense of well being and increases libido and sex drive.

What is the dosage of Testosterone acetate powder?

Testosterone acetate powder is an Androgen, commonly used for bodybuilding, physically maintaining and promoting the development of masculinity and sexual organs.

For men, the recommended dosage is 250 - 1000 mg per week, and is not recommended for women use. The cycle can last from 8-12 weeks. These doses are sufficient to achieve high results, both the strength and mass increase.

If you are on a gram and a half of test like a competitive bodybuilder, you are going to always have very high blood levels of test. But of course, that is not very healthy. For those more health conscious, much lower levels are selected. A relatively safe cycle will have 4-500 mgs of test a week. An HRT dose of test is under 250 mgs week. Keep in mind, you are on HRT nearly year round, and that is why you should stay at or below 250. Test ace powder gives you a short term boost when you need it.

How Testosterone acetate powder works?

Testosterone acetate powder is a steroid lipid molecule. Testosterone acetate powder works by replacing the testosterone that the body is

missing. Testosterone acetate powder should only be used if testosterone deficiency has been confirmed by symptoms and blood tests. Testosterone is the male hormone, classified as an androgen or endocrine metabolic agent, and is responsible for development of the secondary sex characteristics in men including development and maintenance of sexual organs, facial hair growth, muscle development, and other attributes. In prescription form, it is used to treat male testosterone issues, including low testosterone levels (hypogonadism). Testosterone acetate powder is just one form of ester. Numerous forms of testosterone are available on the market today. Some are more potent than others, such as Testosterone acetate powder. Testosterone acetate powder injections are one of the most popular forms of treatment for low testosterone levels or hypogonadism in adult males. Injections are also commonly used by bodybuilders to enhance muscle gains.

Function

1. Testosterone Acetate is Oil-based fast-acting injectable steroid.
2. Testosterone Acetate is acting much faster than Enanthate and Cypionate. Testosterone Acetate requires a more frequent injection schedule such as every day or every other day in order to keep blood levels as stable as possible. The benefit is that the steroid can be cleared from the body much more quickly after use is discontinued, thus making it a more preferable choice for tested athletes.
3. The most common anabolic hormone that there is and is also considered the most basic. Due to this, athletes often consider it the base steroid to most all cycles.
4. Both anabolic and androgenic in nature. Athletes use Testosterone Acetate to see dramatic gain in muscle size and strength, as well as an overall sense of well being and increases libido and sex drive.

Package and Shipping Of Testosterone acetate :

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

Shipping:

With 3-5 days after your payment

FAQ Of Testosterone acetate :

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.
