

Testosterone Anabolic Steroid Powder Testosterone Acetate For Muscle Building

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febr Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Name: Testosterone Acetate
- Cas No: 1045-69-8
- Molecular Formula: $C_{21}H_{30}O_3$
- Molecular Weight: 330.47
- Purity: 99.0%
- Appearance: White Crystalline Powder
- Shelf Life: 2 Years
- Highlight: **Testosterone Anabolic Steroid Powder, Acetate Testosterone Anabolic Steroid, Muscle Building Testosterone Powder**

Product Description

Testosterone Anabolic Steroid Powder Testosterone Acetate For Muscle Building

Basic Information form Of Testosterone Acetate:

Product Name	Testosterone Acetate
Cas No.	1045-69-8
Molecular Formula	C ₂₁ H ₃₀ O ₃
Molecular Weight	330.47
Appearance	white powder
Purity	99.0%
Shelf life	2 years

Description Of Testosterone Acetate:

Testosterone Acetate is an androgenic steroid with a pronounced anabolic effect. Most acetate treatments deliver medication to the body relatively quickly. Testosterone Acetate has very low risk of water retention. Individuals that utilize this form of Testo**sterone also claim that it is arguably the most painless form of Testosterone.

Testosterone Acetate ester is much faster acting, and thus requires a more frequent schedule in order to keep blood levels as stable as possible. The benefit to this however, is that the steroid can be cleared from the body much more quickly after use is discontinued, thus making it a more preferable choice for tested athletes. Athletes use Testosterone Acetate to see dramatic gain in muscle size and strength, as well as an overall sense of well being and increases libido and sex drive.

Testosterone acetate Under partially anaerobic conditions, production of testosterone acetate was limited, and the substrate was converted mainly to 20 α -hydroxypregn-4-en-3-one. In order to clarify the role of molecular oxygen in the course of side-chain cleavage of progesterone by *C. resinae*, a double tracer method was applied using ¹⁸O₂ as a tracer of molecular oxygen and ¹⁴C as a tracer of the steroidal substrate.

After the microbiological transformation of progesterone under ¹⁸O₂ atmosphere, testosterone acetate, along with the testosterone derived from the testosterone acetate by microbial esterase during the culture, and the testosterone which was chemically produced by saponification of the testosterone acetate, were obtained and subjected to mass-spectrometric analysis.

Application Of Testosterone acetate

Testosterone Acetate combination of Testosterone and ester acetate, Testosterone Acetate is an androgenic steroid with a pronounced anabolic effect. Most acetate treatments deliver medication to the body relatively quickly. Testosterone Acetate has very low risk of water retention. Individuals that utilize this form of also claim that it is arguably the most painless form of . Testosterone Acetate ester is much faster acting, and thus requires a more frequent schedule in order to keep blood levels as stable as possible.

The benefit to this however, is that the steroid can be cleared from the body much more quickly after use is discontinued, thus making it a more preferable choice for tested athletes. Athletes use Testosterone Acetate to see dramatic gain in muscle size and strength, as well as an overall sense of well being and increases libido and sex drive.

American athletes have a long and fond relationship with testosterone cypionate. While testosterone enanthate is manufactured widely throughout the world, cypionate seems to be almost exclusively an American item. But many claim this is not just a matter of simple pride, often swearing cypionate to be a superior product, providing a bit more of a "kick" than enanthate. At the same time it is said to produce a slightly higher level of water retention, but not enough for it to be easily discerned.

Function Of Testosterone acetate

1. Testosterone Acetate is Oil-based fast-acting injectable steroid.
2. Testosterone Acetate is acting much faster than Enanthate and Cypionate. Testosterone Acetate requires a more frequent injection schedule such as every day or every other day in order to keep blood levels as stable as possible.

The benefit is that the steroid can be cleared from the body much more quickly after use is discontinued, thus making it a more preferable choice for tested athletes.

3. The most common anabolic hormone that there is and is also considered the most basic. Due to this, athletes often consider it the base steroid to most all cycles.

4. Both anabolic and androgenic in nature. Athletes use Testosterone Acetate to see dramatic gain in muscle size and strength, as well as an overall sense of well being and increases libido and sex drive.

Package and Shipping Of Testosterone acetate :

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

Shipping:

With 3-5 days after your payment

FAQ Of Testosterone acetate :

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
