

Raw Steroid Powders Testosterone Base Improve Lean Muscle Strength

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febré Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

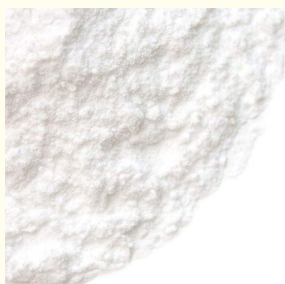

Product Specification

- Name: Testosterone Base
- Cas No: 58-22-0
- Molecular Formula: C₁₉H₂₈O₂
- Molecular Weight: 288.42
- EINECS: 200-370-5
- Purity: 99%
- Appearance: White Crystalline Powder
- Shelf Life: 2 Years
- Highlight: **Testosterone Base Raw Steroid Powders, Lean Muscle Testosterone Base**

Product Description

Raw Steroid Powders Testosterone Base Improve Lean Muscle Strength

Basic Information form Of Testosterone Base:

Product Name	Testosterone Base
Cas No.	58-22-0
Molecular Formula	C ₁₉ H ₂₈ O ₂
Molecular Weight	288.42
Appearance	white powder
Fineness	99%
Shelf life	2 years

What Is Testosterone Base?

Testosterones is the undisputed king of steroids mainly because it is safe, elicits rapid mass and strength gains while maintaining libido, a sense of well being and energy. It's not uncommon for a first time user to gain 15-20lbs of LBM in a standard Testosterones cycle. Pure Testosterones comes in a water based aqueous form (Suspension) and also in a solvent/oil based form (Test Base).

Suspensions have tiny particles that are visible with the naked eye. If left on the shelf for a few days many times the particles will sink to the bottom leaving the clear solvents and water on the top. Depending on the manufacturer, particle sizes vary meaning some Suspension preparations can clog a 22 gauge needle. Ultra micronized Suspension can pass through a 25 gauge needle making injections more comfortable. Shake the suspension preparation vigorously before injecting.

Testosterones suspension is the most potent form of testosterones because it does not possess an ester. Esters are calculated into the steroid weight therefore esterified steroids are not a true mg for mg of free hormone. 100mg of suspension is 100mg of free hormone! Enanthate in a solution is only 72mg of free hormone per 100mg. You can see that Suspension is the true king steroid. However because there is no ester many users will inject suspension everyday or even multiple times per day. This is usually reason enough for most people to reject using suspension but it gets worse. Usually suspension is quite painful as well. Combine every day injections with significant pain and most users simply pass on trying suspension at all. Some new science now demonstrates that everyday and even every other day injections are not necessary with Testosterones Suspension.

Application Of Testosterone Base

Intramural Cycle Anabolic Steroids Powder Testosterones Bases Base. Although there are many hormones, we can dwell on the importance of Testosterones Base in terms of function and good health, in particular for men.

Men and women need Testosterones Base to run their bodies, but men need amounts much higher than their female counterparts.

Although a very important hormone and widely misunderstood, Testosterones Base is however one of the most exciting hormones to understand, especially regarding their improved performance and physical.

In fact we can say that this is the most important hormone to improve athletic performance and development of the body and muscles (bodybuilding). Without adequate levels of Testosterones Base Our objectives will not be achieved, and without artificial increase in levels of the hormone Testosterones Base You can say goodbye to the idea of exceeding your goals and why not break records. It will be interesting to have a general understanding of the hormone itself, and then you will understand how to maximize its use in all its forms.

Testosterones Base is a hormone that we produce naturally, and for centuries athletes of all types have experienced the absorption of extract of testes. But the real Testosterones Base and artificially synthesized for human use appeared to 1935, largely thanks to chemists Adolf Butenandt et Leopold Ruzicka, both of which have received a Nobel Prize for their work.

The hormone Testosterones Base is now isolated and synthesized, the first successful Testosterones Base injections were possible in the form

of Testosterones Base propionate.

Testosterones Base belongs to the class of androgens. In fact, this is the main androgenic hormone in the body. It is a very powerful hormone and Testosterones Base is largely responsible for the development of the testicles and prostate, as well as development of muscle tissue, bone density and strength. Beyond these basic functions, Testosterones Base is essential to our health and general well-being. Low levels of Testosterones Base can not only negatively affect muscle strength and bone density, but can also affect our mood. Although part of the androgen class of steroidal hormones, Testosterones Base is also strongly anabolic. Both anabolic and androgenic, Testosterones Base is like all steroid hormones, is derived from cholesterol and its natural production is largely regulated by the luteinizing hormone (LH) and follicle stimulating hormone (FSH).

For these hormones to be released, the pituitary gland must first be driven, and once LH and FSH are released, the stimulation of the testis is obtained, thereby causing the production of Testosterones Base.

As you can see, important though the testes are in the production of Testosterones Base, the pituitary gland is also a key. Without normal functioning of the pituitary gland (in the brain), the natural production of Testosterones Base can not do.

Package and Shipping Of Testosterone Base :

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

Shipping:

With 3-5 days after your payment

FAQ Of Testosterone Base:

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
