

99% Testosterones Steroids Test Base Powder Bodybuilding Testosterone Base

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febr Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Name: Testosterone Base
- Cas No: 58-22-0
- MF: C₁₉H₂₈O₂
- MW: 288.42
- EINECS: 200-370-5
- Purity: 98%
- Appearance: White Crystalline Powder
- Shelf Life: 2 Years
- Highlight: 99% Testosterone Base Powder, Bodybuilding Test Base Powder

Product Description

99% Testosterones Steroids Test Base Powder Bodybuilding Testosterone Base

Basic Information form Of Testosterone Base:

Product Name	Testosterone Base
Cas No.	58-22-0
MF	C ₁₉ H ₂₈ O ₂
MW	288.42
Appearance	white powder
Purity	98%
Shelf life	2 years

What Is Testosterone Base?

TestosteroneBase is an injectable steroid that contains Testosteronebase with no ester attached to it. TestosteroneBase is the most common anabolic hormone that there is and is also considered the most basic. Due to this, bodybuilders often consider it the base steroid to most all cycles.

Product Image Of Testosterone Base:

Application Of Testosterone Base:

1. Medical uses: For none of testosterone replacement therapy, treatment of male climacteric syndrome, impotence.
2. Sports use: To increase the amount of muscle. Some people use it to increase the number of muscles
3. Other uses: Biochemical studies about natural male hormone, control male sex organs and development of male secondary sexual character and growth.

Intramuscular Cycle Anabolic Steroids Powder Testosterones Bases . Although there are many hormones, we can dwell on the importance of Testosterones Base in terms of function and good health, in particular for men.

Men and women need Testosterones Base to run their bodies, but men need amounts much higher than their female counterparts.

Although a very important hormone and widely misunderstood, Testosterones Base is however one of the most exciting hormones to understand, especially regarding the improved performance and physical.

In fact we can say that this is the most important hormone to improve athletic performance and development of the body and muscles (bodybuilding). Without adequate levels of Testosterones Base our objectives will not be achieved, and without artificial increase in levels of the hormone Testosterones Base you can say goodbye to the idea of exceeding your goals and why not break records. It will be interesting to have a general understanding of the hormone itself, and then you will understand how to maximize its use in all its forms.

Testosterones Base belongs to the class of androgens. In fact this is the main androgenic hormone in the body. It is a very powerful hormone and Testosterones Base is largely responsible for the development of the testicles and prostate, as well as development of muscle tissue, bone density and strength. Beyond these basic functions, Testosterones Base is essential to our health and general well-being. Low levels of Testosterones Base can not only negatively affect muscle strength and bone density, but can also affect our mood. Although part of the androgen class of steroidal hormones, Testosterones Base is also strongly anabolic. Both anabolic and androgenic, Testosterones Base is like all steroid hormones, is derived from cholesterol and its natural production is largely regulated by the luteinizing hormone (LH) and follicle stimulating hormone (FSH).

For these hormones are released, the pituitary gland must first be driven, and once LH and FSH are released, the stimulation of the testis is obtained, thereby causing the production of Testosterones Base.

As you can see, important though the testes in the production of Testosterones Base, the pituitary gland is also a key. Without normal functioning of the pituitary gland (in the brain), the natural production of Testosterones Base can not do.

Testosterone Base Powder therapy:

For people who are worried about low or high testosterone, a doctor may perform a blood test to measure the amount of the hormone in the patient's blood. When doctors find low-T, they may prescribe testosterone therapy, in which the patient takes an artificial version of the hormone. This is available in the following forms: a gel to be applied to the upper arms, shoulders or abdomen daily; a skin patch put on the body or scrotum twice a day; a solution applied to the armpit; injections every two or three weeks; a patch put on the gums twice a day; or implants that last four to six months.

Men using testosterone gels must take precautions, such as washing hands and covering areas where the gel is applied, according to the U.S. Food and Drug Administration. Women and children should not touch the gel or the skin where the gel or patch is applied.

Package and Shipping Of Testosterone Base :

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

Shipping:

With 3-5 days after your payment

FAQ Of Testosterone Base:

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.
