

Medical Androsterone Cycle Therapy Prohormone Steroids Testosterone Base

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febr Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product Name: Testosterone Base
- Cas No: 58-22-0
- MF: C₁₉H₂₈O₂
- MW: 288.42
- Purity: 99.3%
- Appearance: White Crystalline Powder
- EINECS: 200-370-5
- Shelf Life: 2 Years
- Highlight: Therapy Prohormone Steroids Testosterone Base
, Medical Androsterone Testosterone Base

Product Description

Medical Androsterone Cycle Therapy Prohormone Steroids Testosterone Base

Basic Information form Of Testosterone Base:

Name	Testosterone Base
Cas No.	58-22-0
MF	C ₁₉ H ₂₈ O ₂
MW	288.42
Appearance	white powder
Purity	99.3%
Shelf life	2 years

What Is Testosterone Base?

Testosterone is a steroid hormone from the androgen group and is found in mammals, reptiles, birds, and other vertebrates. In mammals, testosterone is secreted primarily by the testicles of males and the ovaries of females, although small amounts are also secreted by the adrenal glands. It is the principal male sex hormone and an anabolic steroid.

In men, testosterone plays a key role in the development of male reproductive tissues such as the testis and prostate as well as promoting secondary sexual characteristics such as increased muscle, bone mass, and the growth of body hair. In addition, testosterone is essential for health and well-being[4] as well as the prevention of osteoporosis.

Application Of Testosterone Base:

Testosterone is the undisputed king of steroids mainly because it is safe, elicits rapid mass and strength gains while maintaining libido, a sense of well being and energy. It's not uncommon for a first time user to gain 15-20lbs of lbm in a standard testosterone cycle. Pure testosterone comes in a water based aqueous form (suspension) and also in a solvent/oil based form (test base).

- increases nitrogen retention in the muscles
- increases protein synthesis
- increases red blood cell count
- increases total metabolic activity
- decreases glucocorticoid steroids (muscle wasting hormones)
- increases igf-1 production

These are the basic traits of testosterone in regards to why a performance enhancer might supplement; of course based on the effects of low testosterone they can be very useful too. Through these traits, we are able to build more muscle with less body-fat; we are able to lose more body-fat while preserving more muscle tissue. Further, we are able to perform at a higher level of efficiency as our recovery time is cut down tremendously. All-in-all testosterone provides everything any performance enhancer could ever be after regardless of their purpose and individual goals.

Effects Of Testosterone Base :

Testosterone is a steroid hormone from the androgen group and is found in humans and other vertebrates. In humans and other mammals, testosterone is secreted primarily by the testicles of males and, to a lesser extent, the ovaries of females. Small amounts are also secreted by the adrenal glands.

It is the principal male sex hormone and an anabolic steroid. In general, androgens promote protein synthesis and growth of those tissues with androgen receptors. Testosterone effects can be classified as virilizing and anabolic.

1. Anabolic effects include growth of muscle mass and strength, increased bone density and strength, and stimulation of linear growth and bone maturation.

2. Androgenic effects include maturation of the sex organs, particularly the penis and the formation of the scrotum in the fetus, and after birth (usually at puberty) a deepening of the voice, growth of the beard and axillary hair. Many of these fall into the category of male secondary sex characteristics.

3. Testosterone effects can also be classified by the age of usual occurrence. For postnatal effects in both males and females, these are mostly dependent on the levels and duration of circulating free testosterone.

Package and Shipping Of Testosterone Base :

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

Shipping:

With 3-5 days after your payment

FAQ Of Testosterone Base:

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
