

CAS 58-22-0 White Powder Estosterone Anabolic Steroid For Enhancing Male Sexual

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febr Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product Name: Testosterone Base
- Synonyms: Test Base
- Cas No: 58-22-0
- MW: 288.42
- MF: C19H28O2
- Purity: 99%Min
- Appearance: White Crystalline Powder
- Shelf Life: 2 Years
- Highlight: Enhancing Male Sexual Testosterone Anabolic Steroid
, CAS 58-22-0 Testosterone Anabolic Steroid

Product Description

CAS 58-22-0 White Powder testosterone Anabolic Steroid For Enhancing Male Sexua

Basic Information form Of Testosterone Base:

Name	Testosterone Base
Cas No.	58-22-0
Synonyms	Test Base
MF	C ₁₉ H ₂₈ O ₂
MW	288.42
Appearance	white crystalline powder
Purity	99.4%
Shelf life	2 years

What Is Testosterone Base?

Testosterones Base belongs to the class of androgens. In fact, this is the main androgenic hormone in the body. It is a very powerful hormone, and Testosterones Base is largely responsible for the development of the testicles and prostate, as well as development of muscle tissue, bone density, and strength.

Test base is the undisputed king of steroids mainly because it is safe, elicits rapid mass and strength gains while maintaining libido, a sense of well-being, and energy. It's not uncommon for a first-time user to gain 15-20 lbs of LBM in a standard Testosterones cycle. Pure Testosterones comes in a water-based aqueous form (Suspension) and also in a solvent/oil-based form (Test Base).

Suspensions have tiny particles that are visible with the naked eye. If left on the shelf for a few days, many times the particles will sink to the bottom, leaving the clear solvents and water on top. Depending on the manufacturer, particle sizes vary, meaning some Suspension preparations can clog a 22-gauge needle. Ultra-micronized Suspension can pass through a 25-gauge needle, making injections more comfortable. Shake the suspension preparation vigorously before injecting.

Testosterones Base is the most common anabolic hormone that there is and is also considered the most basic. Due to this, bodybuilders often consider it the base steroid to most all cycles. Testosterones Base is both anabolic and androgenic in nature. Users of this steroid will notice a dramatic gain in muscle size and strength, as well as an overall sense of well-being and increased libido and sex drive.

Application Of Testosterone Base:

Test Base is a steroid that contains Testosterone with no ester attached to it; it is pure Testosterone and has no ester attached, and thus no ester is calculated in the weight; Where 100 mg of a testosterone ester equals 100 mg minus the weight of the ester; 100 mg of Testosterone Base contains an actual 100 mg of the steroid; Very potent and very powerful.

Although it is a rather crude compound, it is without a doubt very effective; Testosterone Base is the most common anabolic hormone that there is and is also considered the most basic; Due to this, bodybuilders often consider it the base steroid to most all cycles; Testosterone Base is both anabolic and androgenic in nature; Users of this steroid will notice a dramatic gain in muscle size and strength, as well as an overall sense of well-being and increased libido and sex drive.

Testosterone suspension is the most potent form of testosterone because it does not possess an ester; Esters are calculated into the steroid weight, therefore esterified steroids are not a true mg for mg of free hormone; 100 mg of suspension is 100 mg of free hormone; Enanthate in a solution is only 72 mg of free hormone per 100 mg; You can see that Suspension is the true king steroid.

However, because there is no ester, many users will inject suspension every day or even multiple times per day. This is usually a reason enough for most people to reject using suspension, but it gets worse. Usually, suspension is quite painful as well; Combine every

day injections with significant pain and most users simply pass on trying suspension at all. Some new science now demonstrates that everyday and even every other day injections are not necessary with Testosterone Suspension&period.

Package and Shipping Of Testosterone Base :

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

Shipping:

With 3-5 days after your payment

FAQ Of Testosterone Base:

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
