

5mg/Vial TB 500 Hormone Peptide For Tendinitis And Acute Injury Treatment

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-TB 500 Peptide
- Minimum Order Quantity: 5 box
- Price: US \$ 60-70 / Box
- Packaging Details: 5mg/vial, 10vials/Box
- Delivery Time: 3~5 days, upon receipt of payment
- Payment Terms: T/T, Western Union,
- Supply Ability: 5000 boxes per month

Product Specification

- Product Name: TB 500
- CAS No: 77591-33-4
- Molecular Formula: C₂₁₂H₃₅₀N₅₆O₇₈S
- Molecular Weight: 4963.44
- Appearance: White Lyophilized Powder
- Storage: Keep In Dark Place, Inert Atmosphere, Store In Freez
- MOQ: 5 Box
- Highlight: 5mg/Vial TB500 Peptide,
TB 500 Hormone Peptide,
77591-33-4 Hormone Peptide

WHY CHOOSE US

- 1 Own Factory**
Hongbaiyi has its own factory, which covers 18,000 square meters and is equipped with 4 standardized production workshops.
- 2 Professional Supplier**
Hongbaiyi is a professional supplier of APIs, pharmaceutical intermediates, veterinary medicine, cosmetic raw, nutritional supplements and other natural active ingredients.
- 3 Quality Assurance**
With strict QC system, our product quality is very reliable and stable. Besides, we have strong technical research and development strength.
- 4 Sales Team**
The experienced sales team of Hongbaiyi offers 7*24*365 quality service and the products were exported to over 40 countries around the globe.

OUR CERTIFICATE

Product Description

Hormone Peptide TB-500 2mg/vial TB 500 Treatment For Tendinitis And Acute Injury

Product Details of Tb500 :

Product Name	TB 500
Appearance	White powder
Specification	5mg/vial, 10vials/Box
Assay	99%min
Test	HPLC
CAS	77591-33-4
MF	C212H350N56O78S
Storage	Keep in Dark Place, Inert Atmosphere, Store in Freez

Description Of Tb500

TB-500 is a synthetic fraction of the protein thymosin beta-4, which is present in virtually all human and animal cells. The main purpose of this peptide is to promote healing. It also promotes creation of new blood and muscle cells. The healing effects of TB-500 have been observed in tendons, ligaments, muscle, skin, heart, and the eyes. Thymosin beta-4 is naturally produced in higher concentration where tissue has been damaged. This peptide is also a very potent anti-inflammatory agent.

When to use TB-500 ?

I recommend TB-500 in the case of acute injury, judging by rule of thumb, healing may be slow, or in the case of chronic injury, otherwise it will not heal.

Associated injury types include tendinitis and muscle tear or strain, but may include many types of muscle and connective tissue injury as well as skin damage. TB-500 can provide a significant improvement if muscle damage leads to impaired flexibility. About horse racing, allegedly prevents the formation of adhesions. No matter what the situation is even in humans even so, I can not say, but there are real signs that it helps to treat the existing adhesions.

How to use TB 500 ?

The TB-500 was typically supplied in a 2.0 mg vial by lyophilized powder. An appropriate amount of sterile or bacteriostatic water, for example 1.0 mL, will be added. In the most common dosing regimen, the entire vial is taken at one time. If you take the entire vial, the whole amount will be sucked into the syringe, usually an insulin syringe, and injected. According to personal preferences, injection can be subcutaneous, intramuscular or intravenous.

The most common dosing regimen is taking 2.0 or 2.5 mg TB-500 twice a week for four to six weeks and then lowering it to a lower rate of administration, for example, once or twice a month for maintenance.

With regard to TB-500 dose, the knowledge system is still limited. The above agreement may or may not be the most effective, but it is the protocol with the most records. It is entirely possible that, with the acquisition of knowledge, the use of the method will change. For example, it is reasonable to increase the frequency of administration to 3x / week (I have done the effect yourself) or increase the dose to 4 or 5 mg twice a week. However, before starting such a procedure, I recommend trying the standard protocol first.

If you are interested in the use of animals, the typical dosage regimen of the horse is 6 times 10 mg injections at intervals of 10-10 days. For more intensive treatment, use 20 mg per week. For racing dogs, the typical program is six times a week for 5 mg injections.

Product Photos Of TB 500

Function Of TB 500:

1. Thymic glands and various local cells in the human body produce thymic β -4(TB-4), which is present in extremely high concentrations in the cytoplasm of wounds. Tb-500 has a healing part of the TB-4 sequence (refer to the entire end of growth hormone fragment for action extraction), and the main purpose of TB-500 is its ability to promote upregulation of cells in the body. Upregulation increases cell sensitivity to action, especially in proteins such as actin. This action helps regulate inflammation in the injured part of the body and provides new access to blood vessels.
2. Tb-500 has a very low molecular weight, enabling it to have a high level of mobility in the body. In short, the TB-500 can be applied to the whole body, reaching almost any location. The TB-500 doesn't have to be applied to the area of injury; its effects can be applied to the whole body, no matter where the injection site is.
3. In the world of anabolic metabolism, TB-500 is mostly not used for muscle growth, fat loss, and improved athletic performance. It is mostly used to promote healing, especially for body wounds or joint injuries. Tb-500 can be used to treat muscle tear or strain, tendon inflammation, and even skin injury. The peptide does not cause immediate healing of the injured area. If the muscle tears, it tears, but in many cases using the TB-500 speeds up the healing process.
4. For chronic injuries, such as stress on the joints caused by bodybuilders working hard in the gym every day, THE TB-500 can provide excellent protection. The effects of TB-500 can also promote hair growth, especially hair loss caused by androgen alopecia, which may be reversed by tB-500 use.

FAQ Of TB 500

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
