

CAS 77591-33-4 Human Growth Hormone Peptides Steroid TB500 Powder For Promoting Healing

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-TB 500
- Minimum Order Quantity: 5 box
- Price: US \$ 40-49/ Box
- Packaging Details: 2mg/vial, 10vials/Box
- Delivery Time: 3~5 days, upon receipt of payment
- Payment Terms: T/T, Western Union,
- Supply Ability: 5000 boxes per month

Product Specification

- Product Name: TB 500
- CAS No: 77591-33-4
- Molecular Formula: C₂₁₂H₃₅₀N₅₆O₇₈S
- Molecular Weight: 4963.44
- Storage: Keep In Dark Place, Inert Atmosphere, Store In Freez
- Appearance: White Lyophilized Powder

Product Description

CAS 77591-33-4 Human Growth Hormone Peptides Steroid TB500 Powder For Promoting Healing

Product Details of Tb500 :

Product Name	TB 500
Appearance	White powder
Specification	2mg/vial, 10vials/Box
Purity	99%
CAS	77591-33-4
MF	C ₂₁₂ H ₃₅₀ N ₅₆ O ₇₈ S
MW	4963.44

Description Of Tb500

TB-500 is a synthetic fraction of the protein thymosin beta-4, which is present in virtually all human and animal cells. Thymosin beta-4 is a very large molecule. In fact, it is so large that it cannot fit entirely into the receptor. Different sections of the molecule have different activities. TB-500 is the part of thymosin beta-4 hormone which promotes the most useful effects (overall healing, repair, new blood and muscle cells). For medical applications it is more practical to use the TB-500 instead of the entire Thymosin Beta-4 protein.

TB-500 is a short peptide segment or fragment of the naturally-occurring thymosin beta-4 hormone (TB-4.) To be clear, TB-500 most emphatically is not TB-4, although it's often sold under that name. TB-4 itself is as yet an extremely pricey, rare research material that is not yet available to bodybuilding or to equine enhancement.

In the body, TB-4 is produced in the thymus, a gland which is at its largest in children, atrophies as adulthood progresses, and is virtually non-existent in the elderly. It is also produced locally in various cells, and is particularly found in wound fluids, as well as in fairly high concentration in the cytoplasm of some cells. In various studies, TB-4 has been found able to promote various forms of wound healing, to promote differentiation of stem cells, and to reduce inflammation.

Protein hormones such as TB-4 do not bind in their entirety to a receptor site, as they are too large to fit. Instead, an active region of the protein fits into receptor sites.

The TB-500 peptide sequence is identical with the active region area of TB-4 and shares many and possibly all of the properties of TB-4, in a form which is more economical to produce.

Product Photos Of TB 500

Application Of TB-500:

The main purpose of TB500 is to promote healing. It also promotes creation of new blood and muscle cells. The healing effects of TB-500 have been observed in tendons, ligaments, muscle, skin, heart, and the eyes. Thymosin beta-4 is naturally produced in higher concentration where tissue has been damaged.

TB-500 is specifically designed to help deal with injured athletes and bodybuilders, it is an injectable peptide drug which can be used to promote healing, enhance range of motion in cases of injury, or reduce pain in case of injury by reducing inflammation. This peptide is also a very potent anti-inflammatory agent.

TB500 is a synthetic peptide that has been directly linked to recovery as it plays a vital role in building new blood vessels, new small muscle tissue fibers, cell migration and blood cell reproduction. If you are an injured athlete, all of these properties are something that becomes very

desirable when looking to speed up the recovery process.

Dosage And Usage

TB500 is distributed as a lyophilized powder that should be kept out of the light and in a cool dry place. Reconstitution is done with bacteriostatic water or sodium chloride meant for injection. Doses range from 2-2.5mg twice weekly for 4-6 weeks (some user have reported success in dosing higher up to 8mg a week but how much more effective this is yet to be seen) . Beyond that, one to two monthly injections of 2-2.5mg of TB500 can be further utilized to maintain rapid recovery and flexibility in strained areas.

For optimal recovery, a combination of TB500 with MK-2866 (Ostarine) should be used. This combination allows the healing benefits of SARMS and peptides to delivery maximum results.

FAQ Of TB 500

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
