

99% Purity Real Peptides TB500 Thymosin Beta 4 Powder For Promote Healing

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-TB 500
- Minimum Order Quantity: 5 box
- Price: US \$ 38-49/ Box
- Packaging Details: 2mg/vial, 10vials/Box
- Delivery Time: 3~5 days, upon receipt of payment
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 5000 boxes per month

Product Specification

- Product Name: TB 500
- CAS No: 77591-33-4
- Molecular Formula: C₂₁₂H₃₅₀N₅₆O₇₈S
- Molecular Weight: 4963.44
- Appearance: White Lyophilized Powder
- Assay: 99%

Product Description

Potent Anti-inflammatory Agent Polypeptides TB500 For Damage Healing CAS 77591-33-4

Product Details of Tb500 :

Product Name	TB 500
Appearance	White powder
Specification	2mg/vial, 10vials/Box
Purity	99%
CAS	77591-33-4
MF	C212H350N56O78S
MW	4963.44

Description Of Tb500

TB-500 is a synthetic fraction of the protein thymosin beta-4, which is present in virtually all human and animal cells. The main purpose of this peptide is to promote healing. It also promotes creation of new blood and muscle cells. The healing effects of TB-500 have been observed in tendons, ligaments, muscle, skin, heart, and the eyes. Thymosin beta-4 is naturally produced in higher concentration where tissue has been damaged. This peptide is also a very potent anti-inflammatory agent.

TB-500 is an injectable peptide drug which can be used to promote healing, enhance range of motion in cases of injury, or reduce pain in case of injury by reducing inflammation. As yet its human use has been relatively uncommon and limited to individuals who like to experiment. Use in race horses has been more widespread, though it's not a prescription veterinary drug.

Product Photos Of TB 500

Application Of TB-500:

TB-500 has been known to promote at least partial regrowth of hair which has been lost to male-pattern baldness, to darken at least a portion of hair which has grayed, and is reported to enhance muscle mass in horses. The latter effect may be due to promoting differentiation of satellite cells. Bodybuilders who have used TB-500 for healing purposes have however generally not reported such an effect. However, it might be that the effect occurred, but was attributed to other causes, or that effect did not occur because TB-500 is generally used only when injured, which tends not to be a time of training for best gains.

TB-500 is typically provided as lyophilized (freeze-dried) powder in vials of 2.0 mg. A convenient amount of sterile or bacteriostatic water will be added, such as 1.0 mL. In the most common dosing protocol, the entire vial is taken at one time. If taking the entire vial, the entire amount will be drawn into a syringe, typically an insulin syringe, and injected. Injection may be subcutaneous, intramuscular, or intravenous, according to personal preference.

The most common dosing protocol is to take 2.0 or 2.5 mg of TB-500 twice per week for four to six weeks, and then reduce to a lower dosing rate such as once or twice per month for maintenance.

Reports show that TB-500 is known to mimic part of a larger peptide called Thymosin Beta 4. However, because of TB-500 being smaller, researchers found that it was easier for the body to absorb and use. It is primarily used in research for its healing properties as it is able to aid in faster wound healing. TB-500 does this by building new blood vessels and muscle tissue fiber. It also allows for new cell migration and blood cell reproduction.

The body of knowledge is as yet limited with regard to TB-500 dosage. The above protocol may or may not be the most efficient, but it is the protocol with the most track record. It's entirely possible that as knowledge is gained, method of use will change. A reasonable possibility, for

example, is to increase dosing frequency to 3x/week (which I have done personally to good effect), or to increase dosing to 4 or 5 mg twice per week. Before going to such a program, however, I recommend trying the standard protocol first.

Benefits OF TB 500:

Enhanced Recovery
Reduced Inflammation
Improved Flexibility
Aid Recovery of Slow Healing Injuries such as those to connective tissue, i.e. tendons and ligaments
Boost Muscle injuries recovery
Promote healing of skin injuries

FAQ Of TB 500

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
